

Unit1:- Fundamental of Algorithms

1. What is an Algorithm? Explain the rules for creating an algorithm with an example.
2. List the types of algorithms and discuss any one in detail (e.g., Sequence, Branching, or Looping) with an example.
3. What is a Flowchart? Describe the different symbols used in flowcharts.
4. What are the general rules for designing a flowchart?
5. Discuss the advantages of using flowcharts in problem-solving.
6. Differentiate between an Algorithm and a Flowchart with key points

Unit2:-Overview of C

1. List out Features of C Language.
2. Discuss Basic Structure of C Program with example.
3. Write a short note on C Tokens.
4. What is Variable? How to declare Variable? Discuss various Variable declaration rules.
5. Explain Primary Data Types of C Language.
6. How to define Symbolic Constants in C Language? Explain rules to define Symbolic Constants.
7. Discuss User Defined Type declaration (typedef).

Unit-3 :-Operators and Expression

1. What is Operator? Explain Arithmetic, Assignment & Relational Operators.
2. Explain Logical Operators with example.
3. Explain Increment and Decrement operators with example.
4. Discuss Bitwise and Special operators.
5. Explain Conditional or Ternary Operator with example.
6. Write short note on Input/output functions with example. [printf() ,scanf()]
7. Discuss type conversion in 'C' language with example.

Unit-4 :-Decision Making and branching

1. Discuss simple if.....else statement with example.
2. Explain Nested if... else statement with proper example.
3. Explain else.....if ladder with example.
4. What is the use of switch case statement in 'C' language? Explain with proper example.
5. Discuss goto statement with example.
6. Any C Program using Decision Making Statements.

Unit -5 Array and Strings

1. What is Array? Discuss types of array.
2. Discuss compile time initialization of one dimensional array with example.
3. Discuss run time initialization of one dimensional array with example.
4. Write a short note on Two-Dimensional Array.
5. Discuss Multi-Dimensional Array.
6. What is Character Array? Explain Declaration and Initialization of String Variables.
7. Explain getchar(), gets(), putchar(), and puts() functions.
8. Explain String Handling functions with example.
