

UNIT:1

SUB:OAT

1. What is a **Drive** in DOS? Explain different drive operations with examples.
2. Explain the concept of **File and Directory** in DOS. Why are directories important in file management?
3. Write the steps and commands for **Creating, Changing, and Listing a Directory** in DOS. Give examples of each.
4. Explain the DOS commands used for **Copying, Renaming, Changing, and Deleting files** with suitable examples.
5. Differentiate between **Internal and External DOS Commands** with examples of each.
6. What is a **Batch File** in DOS? Write the syntax and explain its importance with an example.
7. Differentiate between **CUI (Character User Interface)** and **GUI (Graphical User Interface)** with examples.

UNIT:2

SUB:OAT

1. Explain the **concept of Word Processing**. Discuss the applications of word processing in various fields.
2. List and explain the **features of MS Word** that make it an effective word processing tool.
3. What is the use of **Columns** in MS Word? Explain with an example.
4. Write the procedure for **Inserting and Formatting a Table, Chart, and Shapes** in a Word document.
5. Differentiate between **Footnote and Endnote**. Explain their use in academic documents.
6. What is **Mail Merge** in MS Word? Explain the process with an example of generating invitation letters.
7. Write a note on the use of **Hyperlinks and References** in MS Word.

UNIT-3

- **Q1:** What is the difference between a worksheet and a workbook in spreadsheets? Give examples.
- **Q2:** Explain at least five real-life applications of spreadsheets in education, business, and research.
- **Q3:** List and explain the important features of spreadsheets that make them useful for data management.
- **Q4:** What is a cell in a spreadsheet? Explain with an example how data is stored in a cell.
- **Q5:** Explain the different types of cell addressing modes (Relative, Absolute, and Mixed) with suitable examples.
- **Q6:** Describe various methods of formatting a worksheet. Why is formatting important in spreadsheets?
- **Q7:** What are charts in spreadsheets? Explain the types of charts and their uses with examples.

8. **Q8:** What is conditional formatting in spreadsheets? Explain with steps and a practical example.
9. **Q9:** Explain the difference between sorting and filtering data in spreadsheets. Provide examples of each.

◆ **Advanced Concepts of Excel**

1. What is **Freeze Panes**? Write steps to use it in Excel.
2. Explain the use of **Goal Seek** with a simple example.
3. What is a **Pivot Table**? Write how to create it.
4. Explain how to use **Data Validation** to allow only specific values.
5. What is a **Macro**? Write the steps to record and run it.
6. What is the use of **Hyperlink** in Excel? Write how to insert one.
7. What is the difference between **VLOOKUP** and **HLOOKUP**?
8. Write steps to **sort and filter data** in Excel.
9. Explain **any four functions** in Excel (Date, Math, Statistical, Financial).
10. What is a **drawing toolbar** in Excel? Name any four tools.

◆ **Concept of PowerPoint**

11. Write steps to **create a new presentation** in PowerPoint.
12. What are the **different views** in PowerPoint? Explain any two.
13. Write the steps to add **slide transitions** and **animations**.
14. Explain how to **insert pictures or charts** in a PowerPoint slide.
15. What are the steps to **save and print** a PowerPoint presentation?

◆ Google Products

16. What is **Google Docs**? Write any four features.
17. What is **Google Sheets**? How is it useful?
18. What is **Google Slides**? Write how it is used for presentations.
19. What is **Google Forms**? Explain its use in collecting information.
20. What is **Google Classroom**? How does it help teachers and students?
