

1. Manipulating Images

(A) Transforming Images

Purpose: To change size, shape, or orientation of an image.

Steps:

1. Open the image in the editing software.
2. Select the image or layer.
3. Go to **Edit** → **Transform**.
4. Choose options like:
 - **Scale** – change size
 - **Rotate** – rotate image
 - **Skew** – tilt image
 - **Flip** – horizontal or vertical
5. Apply the transformation.

Use: Resizing photos, correcting alignment, creating designs.

(B) Adjusting Colors

Purpose: Improve brightness, contrast, and color balance.

Steps:

1. Select the image or layer.
2. Open **Image** → **Adjustments**.
3. Use tools such as:
 - **Brightness/Contrast**
 - **Hue/Saturation**
 - **Color Balance**
 - **Levels / Curves**
4. Adjust sliders and preview changes.
5. Apply when satisfied.

Use: Making dull images more attractive.

(C) Paintbrush Tool

Purpose: Draw, retouch, or paint on images.

Steps:

1. Select the **Brush Tool**.

2. Choose brush size, hardness, and color.
3. Paint directly on the image or on a new layer.
4. Adjust opacity for smooth effect.

Use: Touch-ups, digital painting, masking.

2. Text Manipulations

Purpose: Add and edit text creatively on images.

Steps:

1. Select the **Text Tool (T)**.
2. Click on the image and type text.
3. Change:.
 - Font type
 - Size
 - Color
 - Alignment
4. Apply effects:
 - Shadow
 - Glow
 - Stroke
5. Transform text using **Scale or Rotate**.

Use: Posters, banners, advertisements.

3. Working with Layers and Masks

(A) Managing Layers

Purpose: Organize image elements separately.

Steps:

1. Each object/text creates a new layer.
2. Rename layers for easy identification.
3. Hide/show layers using eye icon.
4. Lock layers to avoid changes.

Use: Non-destructive editing.

(B) Manipulating Layers

Steps:

1. Change layer **opacity**.
2. Use **Blend Modes** (Multiply, Overlay).
3. Move layers up or down.

4. Duplicate or merge layers.

Use: Creating depth and effects.

(C) Using Layer Masks

Purpose: Hide or reveal parts of a layer without deleting.

Steps:

1. Select the layer.
2. Click **Add Layer Mask**.
3. Paint on mask:
 - **Black** hides
 - **White** reveals
4. Adjust mask anytime.

Use: Background removal, smooth blending.

4. Implementing Blur and Distortion Filters

(A) Blur Filters

Purpose: Reduce sharpness or focus attention.

Steps:

1. Select the layer.
2. Go to **Filter** → **Blur**.
3. Choose:
 - Gaussian Blur
 - Motion Blur
4. Adjust blur intensity.

Use: Background blur, soft effects.

(B) Distortion Filters

Purpose: Change shape creatively.

Steps:

1. Select the layer.
2. Go to **Filter** → **Distort**.
3. Choose effects like:
 - Wave
 - Ripple
 - Liquify
4. Adjust settings and apply.

Use: Artistic effects, creative designs.

5. Working with Paths

Purpose: Create precise shapes and selections.

Steps:

1. Select **Pen Tool**.
2. Draw anchor points to form a path.
3. Edit points for smooth curves.
4. Convert path to:
 - Selection
 - Shape
5. Apply color or stroke.

Use: Logo design, object outlining.

6. Image Correction & Repairing

Purpose: Fix damaged or unwanted areas.

Steps:

1. Use **Healing Brush** – removes blemishes.
2. Use **Clone Stamp** – copy pixels from another area.
3. Use **Patch Tool** – repair large areas.
4. Zoom in for accurate correction.

Use: Old photo restoration, skin retouching.

7. Enhancing Images (Special Effects)

Purpose: Make images visually appealing.

Steps:

1. Apply **filters** for effects.
2. Use **layer styles**:
 - Drop Shadow
 - Glow
3. Add textures or overlays.
4. Adjust lighting and colors.
5. Save final image.

Use: Posters, social media, digital art.
