Functional Grammar and Vocabulary

Articles

Definition:

Articles are words that define a noun as specific or unspecific.

Types of Article:

the = definite a/an = indefinite

Definite Article “THE”

The word "the" is one of the most common words in English. It is the only definite article. Nouns in English are preceded by the definite article when the speaker believes that the listener already knows what he is referring to.

We use ‘the’ before a noun when:

- referring to something specific
- there is only one of something (e.g. the cathedral)
- the noun has been mentioned before

Indefinite Article “A” and “AN”

A determiner (A and AN in English) that introduces a noun phrase and implies that the thing referred to is non-specific (as in she bought me a book; government is an art; he went to a public school). Typically, the indefinite article is used to introduce new concepts into a discourse.

We use ‘a/an’ before a noun when:

- referring to something in general
- mentioning something for the first time
- describing someone’s profession (eg. I am a teacher)

Use of Articles:

As a guide, the following definitions and table summarize the basic use of articles. Continue reading for a more detailed explanation of the rules and for examples of how and when to apply them.

For the purposes of understanding how articles are used, it is important to know that nouns can be either countable (can be counted) or uncountable (indefinite in quantity and cannot be counted). In addition, countable nouns are either singular (one) or plural (more than one). Uncountable nouns are always in a singular form.

For example, if we are speaking of water that has been spilled on the table, there can be one drop (singular) or two or more drops (plural) of water on the table. The word drop in this example is a countable noun because we can count the number of drops. Therefore, according to the rules applying to countable nouns, the word drop would use the articles a or the.

Exercise

Choose the correct answer.

1. Emma is Useful member of the family. (a/an/the)
2. This is... plot where she intends to make a building. (a/an/the)
3. She plays ... flute well. (a/an/the)
4. Mt. Everest is Highest peak in the world. (a/an/the)
5. Sri Lanka is ... island. (a/an/the)

Fill in the blanks with correct articles.

1. My mother is ___ English teacher. I am ___ student. When I get home from school, I watch ___ programs on TV. That's ___ best part of my day. ___ programs I watch are for ___ children. I am ___ child, so I think they are funny.
2. I'm ___ little excited because it's ___ Friday today. There are ___ lot of good shows on TV today. ___ one I usually watch at 3:30 is about ___ animals. Also, I'm excited because my mom is making ___ rice for dinner tonight.
3. Later, after eating dinner and doing my homework, I go to my room and read ___ book for 30 minutes. Then I turn off ___ light and go to ___ bed.
4. Moving to ___ United States was ___ most exciting thing I have ever done. I moved last year to ___ New York. New York is ___ exciting city, full of ___ adventure. In fact, I met ___ famous actor on ___ bus yesterday!
5. Today, I have ___ job interview at ___ financial company. ___ company has ___ offices all over ___ world. I'm not sure that I have ___ skills to get hired. I hope so. ___ company's office is on ___ Main Street. That's ___ same street my friend works on. If I get hired, I could meet him after ___ work for drinks. That would be great. He's from ___ Scotland. He works 8 hours ___ day, 5 days ___ week.
6. I have two brothers. One, Greg, is still in ___ college, and ___ other, Mike, has already graduated. Mike is ___ kind of guy that is very serious. I don't remember ___ last time I saw him. It may have been in ___ August. He was wearing ___ red sweater. It matched his ___ red hair.
7. After ___ dinner, I usually wash ___ dishes. My wife hates doing it. I waste a lot of ___ water when I do it. That's bad for ___ environment, I think.
8. We live near ___ sea. ___ most houses in this area are expensive.
9. I have ___ uncle who lives in ___ home for ___ elderly. He is ___ honest man. He used to be ___ FBI agent. He once saved ___ one-year-old boy from ___ fire. He has many interesting stories.
10. He told me that he once met ___ alien from ___ space. This alien didn't need ___ oxygen to live; it didn't have ___ nose. That's ___ hard story to believe. I'm not sure he was telling me ___ truth. Maybe he isn't so honest, after all.

11. ____ stress can make ____ life unpleasant. In ____ day, I work at ____ office. ____ people I work with are busy, and ____ work we do isn't easy. When I drive to ____ work, usually ____ highways are really busy. If there's ____ accident during ____ rush hour, it can be ____ chaos on the roads.
12. I don't watch ____ TV. I get ____ information and ____ news, etc., from ____ Internet. I don't often go to ____ cinema, either. I'm interested in ____ finance. I heard ____ Euro is losing value, compared to ____ US dollar.
13. I like Japan. ____ crime is quite low there. When I fly to Japan, I usually fly to ____ Narita Airport. The last time I was in Japan, I climbed ____ Mount Fuji. It was fun. I am tall. ____ Japanese are generally shorter than I am.

Parts of Speech

Objective:

To acquaint students with a variety of vocabulary patterns and word formation techniques that are needed to improve the vocabulary as vocabulary is a core component of language learning activity.

Explanation:

A well-developed vocabulary is more than essential for effective communication in terms of LSRW (Listening, Speaking, Reading, and Writing). Impressive vocabulary obviously increases our effectiveness as a communicator. In other words, while we communicate, the vocabulary we use always significantly attracts or distracts people from what we speak or write. Similarly, a comfortable level of vocabulary makes it possible to listen, read and understand all the ideas that someone has expressed.

Parts of Speech:

Words are the basic components of any language and they combine to convey an idea, thought or feeling. They perform some specific function in any expression and it is on this basis, they are categorized into the following eight categories called 'Parts of Speech'.

- (1) Noun
- (2) Adjective
- (3) Verb
- (4) Adverb
- (5) Pronoun
- (6) Preposition
- (7) Conjunction
- (8) Interjection

Note: The underlined words in the examples under each category refer to the respective part of speech.

Noun: Noun identifies a person, place, object or thing.

1. Radhika appreciated my qualities.
2. Singapore is a nice and clean destination.
3. The museum is spacious and airy.

Adjective: Adjective qualifies the noun.

1. Mumbai is a large city.

2. He has little intelligence.
3. Few cats like cold water.

Verb: Verb defines action or state of the noun.

1. The Director called the manager.
2. Chicago is a large town.
3. Munjal can converse in Urdu.

Adverb: Adverb qualifies verb, adjective or another adverb in a sentence.

1. The woman passed on the stage quickly.
2. This is a very nice idea.
3. We got there quite regularly.

Pronoun: Pronoun replaces a noun.

1. They believe in self-discipline.
2. This signature is mine.
3. Who is your cousin among those boys?

Preposition: Preposition shows in what relation one word stands with respect to another.

1. Plastic floats on water.
2. The child fell into the well.
3. We made inquiries among students.

Conjunction: Conjunction joins two words or sentences.

1. Although the soldier was wounded, he fought until he died.
2. If the condition is followed, you shall be rewarded.
3. The employees went on strike because the management turned down their demands.

Interjection: Interjections are the words used to express some sudden and powerful feeling.

1. Oh! What a divine jolt to this poor man.
2. Alas! That poor man died of hunger.

3. **Wow!** What a magnificent innings of double century Rohit played in today's one-day.

Exercise

Identify each word in the following sentences.

1. The Prime Minister will expand his ministry tomorrow.
2. We had a better solution to this problem.
3. Delhi is a highly polluted city.
4. Ranbir played a challenging role in this movie.
5. However, he was not well, so he accompanied us to the party.

Tenses

Objective: To provide a basic understanding regarding how a verb changes its form when the time of action is changed.

Explanation: We have studied Parts of Speech in the previous practical. One of the ‘verbs’ has a special significance because it is the only word type that changes its form with the change in the time of action.

A verb is something that tells what someone/something is or what someone does. Mostly, the learners of the English language are greatly confused about the usage of accurate forms of verbs in their communication with others. The focus of this practical shall be on various forms of the verbs and their correct usage in various given communication situations. It is imperative that the user of language must be well-familiar with all the correct forms of the verbs for error-free communication.

Verb tenses show when an action took place, as well as how long it occurred. The main verb tenses are the past, present, and future.

Past Tense:

Simple Past:

We use the simple past to show actions completed in the past, with no extra emphasis.

For regular verbs, you form the simple past tense by adding the suffix –ed to the end of the verb (or just –d if the past tense verb already ends in an e).

Be careful of irregular past tense verbs, however. These don’t follow the normal rules and use their own unique forms for the past tense. For example, the past tense of the irregular verb go is went.

Ex: Regular verbs: I **picked** up the glass, but it **dropped** from my hand.

Irregular verbs: This morning I **went** to the store, but I **forgot** the milk.

1. _____

2. _____

3. _____

Past Continuous:

[was/were] + [present participle]

Use the past continuous to show an ongoing action in the past, especially if the action was interrupted by another action. It’s also used for habitual actions that occurred in the past but not in the present. It’s usually used with adverbs like *always* or adverb phrases like *all the time*.

Ex.: My dog **was whimpering in his sleep** when the TV woke him up.
As kids, my friends and I **were** always **getting** into trouble.

1. _____

2. _____

3. _____

Past Perfect:

[had] + [past participle]

What if you're talking about two different actions in the past and want to show that one happened before the other? The past perfect, also known as the pluperfect, shows that one past action happened earlier than another one.

Ex.: She **had arrived** at the office before she realized it was Sunday.

I ran to my car when I noticed my wife **had left** already.

1. _____

2. _____

3. _____

Past Perfect Continuous:

[had] + [been] + [present participle]

The past perfect continuous tense is used just like the past perfect tense, except it describes ongoing actions that happened in the past instead of a one-time occurrence. It's often used with the words when, until, and before to connect it to another past action.

Ex.: Before he got his first job as a writer, he **had been working** as a proofreader.

I **had been living** on my friend's couch for a year until they kicked me out.

1. _____

2. _____

3. _____

Present Tenses:

Simple Present:

The simple present is the most basic of the English tenses. It's used for individual actions or habitual actions in the present.

Often the simple present is just the root verb with no changes or additions. The main exception to this is when the subject is third person and singular. In this case you add the suffix –s. If the verb ends in o, ch, sh, th, ss, gh, or z, you add –es. If the verb ends in a consonant and y (and the subject is third-person singular), drop the y and add –ies.

Ex.: Today I **feel** like a million bucks!

My brother **carries** the groceries while my sister **stays** on the couch.

1. _____

2. _____

3. _____

Present Perfect:

[have/has] + [past participle]

Although it's quite common, the present perfect is one of the most difficult English verb tenses. It is used to describe a few different types of actions, including:

- an ongoing action started in the past that is not yet completed
- the same action completed multiple times in the past and likely to be completed again
- an action completed very recently (usually with just or now)
- an uncompleted action that is expected to be finished (in the negative)

Additionally, the present perfect can be used to emphasize the significance of a completed action, especially one that happened over time.

Ex.: We **have tricked** him every April Fool's Day since we were kids.

My niece **has grown** so much this year!

1. _____

2. _____

3. _____

Present Continuous:

[am/is/are] + [present participle]

Use the present continuous to show an action happening right now or in the near future.

Ex.: I **am reading** The Hitchhiker's Guide to the Galaxy for the fifth time!

We **are eating** pizza tonight.

1. _____

2. _____

3. _____

Present Perfect Continuous:

[have/has] + [been] + [present participle]

The present perfect continuous shows an ongoing action in the present that was started in the past. It is often used to emphasize the length of time.

Ex.: We **have been waiting** for over an hour!

The team **has been practicing** nonstop for the tournament.

1. _____

2. _____

3. _____

Future Tenses:

Simple Future:

Use the simple future for actions that have not happened yet but will later. To form the simple future, just place the modal verb **will** before the root form of the main verb. (Note that if the action will happen in the **near future**, you can use the present continuous instead.)

Ex.: She **will be** president one day.

I **will** not **go** to the wedding without a date!

1. _____

2. _____

3. _____

Future Perfect:

[will] + [have] + [past participle]

The future perfect shows an action that will be completed in the future by a specified time. Because it depends on another time, the future perfect is often used with words like **by**, **before**, **at**, or **when**.

Ex.: By the time you read this, I **will have** already **left**.

She **will have eaten** lunch before her sister even wakes up.

1. _____

2. _____

3. _____

Future Continuous:

[will] + [be] + [present participle]

Use the future continuous tense for future actions happening over a period of time, especially when a specific time is mentioned. The future continuous tense also shows more certainty and likelihood than the simple future.

Ex.: By this time tomorrow, I **will be drinking** margaritas on the beach.

We **will be attending** a meeting from noon until 3 p.m.

1. _____

2. _____

3. _____

Future Perfect Continuous:

[will] + [have] + [been] + [present participle]

The future perfect continuous depicts future ongoing actions that continue up until a certain point. Like the future perfect and future continuous, it's used with a specified time.

Ex.: In ten minutes, my parents **will have been waiting** in traffic for four hours.

I **will have been eating** healthy for a whole year by September.

1. _____

2. _____

3. _____

Group/Time	Present	Past	Future
Simple	verb / verb + s am/is/are	the second form (regular/irregular)	will + verb
Continuous	am/is/are + verb + ing	was/were + verb + ing	will be + verb + ing
Perfect	have/has + the third form	had + the third form	will have + the third form
Perfect Continuous	have/has been + verb + ing	had been + verb + ing	will have been + verb + ing

Synonyms-Antonyms

1. Definition of Synonyms and Antonyms

Synonyms: Words that have similar or nearly the same meaning as another word.

Example: Happy and joyful are synonyms because they convey similar feelings.

Antonyms: Words that have opposite meanings.

Example: Happy and sad are antonyms because they represent contrasting emotions.

2. Importance of Synonyms and Antonyms

Enhances Vocabulary: Understanding synonyms and antonyms helps in expanding your vocabulary, enabling you to express ideas more precisely.

Improves Communication: Using a variety of words makes communication more engaging and effective, whether in writing or speaking.

Critical for Comprehension: Knowing synonyms and antonyms aids in understanding the context of texts, especially when encountering unfamiliar words.

Essential for Competitive Exams: Proficiency in synonyms and antonyms is often tested in competitive exams and can significantly improve scores.

3. Examples of Synonyms and Antonyms

Synonyms:	Antonyms:
● Begin - Commence ● Bright - Luminous ● Dangerous - Perilous ● Code - Script, Program ● Error - Bug, Glitch ● Encrypt - Encode, Cipher	● Brave - Cowardly ● Victory - Defeat ● Generous - Stingy ● Secure - Vulnerable ● Compress - Decompress ● Compile - Decompile

4. Exercises:

Fill in the blanks with the correct synonym or antonym from the options provided.

1. The professor's lecture was so _____ (stimulating/exciting/tedious) that several students fell asleep. **Antonym:**
2. His approach to the problem was surprisingly _____ (innovative/unique/unoriginal) for someone of his age. **Antonym:**
3. The debate became quite _____ (heated/amicable/passionate) towards the end. **Synonym:**
4. The artist's work is known for its _____ (subtlety/delicacy/obviousness). **Antonym:**
5. She was _____ (elated/delighted/miserable) when she heard the news of her promotion. **Antonym:**

6. The book was filled with _____ (intriguing/fascinating/dull) stories of ancient times.
Antonym:
7. His actions were deemed _____ (heroic/brave/cowardly) by everyone in the community. **Synonym:**
8. The _____ (serene/peaceful/turbulent) waters of the lake were disturbed by a sudden storm. **Antonym:**
9. She handled the situation with _____ (grace/elegance/clumsiness). **Antonym:**
10. The company's financial outlook is quite _____ (promising/optimistic/pessimistic).
○ **Antonym:**
11. The director's vision was both _____ (ambitious/bold/modest) and innovative.
○ **Antonym:**
12. His speech was full of _____ (inspirational/motivational/demoralizing) thoughts.
○ **Antonym:**
13. The software engineer's work was _____ (impeccable/flawless/faulty). **Antonym:**
14. The movie's plot was overly _____ (complicated/intricate/simple) for a casual audience. **Synonym:**
15. The students found the examination to be quite _____ (challenging/demanding/easy).
Antonym:
16. The manager's tone was _____ (respectful/deferential/disrespectful) throughout the meeting. **Antonym:**
17. The room was filled with _____ (chaos/disorder/order) after the meeting ended.
○ **Antonym:**
18. The technology was so _____ (cutting-edge/advanced/outdated) that it left competitors behind. **Antonym:**
19. The speaker's arguments were _____ (persuasive/convincing/unconvincing).
○ **Antonym:**
20. The book's ending was rather _____ (predictable/unexpected/surprising) compared to the rest of the story. **Antonym:**

One Word Substitutes

One Word Substitute means a single word describing a group of words.

One word substitution is the use of one word in place of a wordy phrase in order to make the sentence structure clearer. The meaning, with the replacement of the phrase, remains identical while the sentence becomes shorter.

Algorithm	A step-by-step procedure or formula for solving a problem or performing a task in computing.
Encryption	The process of converting information into a code to prevent unauthorized access.
Metadata	Descriptive information about data, such as its format, origin, or structure.
API (Application Programming Interface)	A set of tools and protocols that allows different software applications to communicate with each other.
Backend	The server-side of a web application that handles data processing, storage, and management.
GUI (Graphical User Interface)	A visual way of interacting with a computer using icons, buttons, and menus.
Bug	An error or flaw in a computer program that causes it to behave unexpectedly.
URL (Uniform Resource Locator)	The address used to access resources on the internet, typically starting with https
Extempore	A speech or a presentation made without previous preparation
Invincible	That which cannot be conquered
Namesake	Somebody or something with the same name as somebody or something else
Optimist	One who looks at the bright side of things; somebody positive
Postscript	A short message added on to the end of a letter after the signature
Veteran	Somebody who is considerably experienced in something
Omnipresent	One who is present everywhere
Fatalist	A person who believes that all events are predetermined

Let's find out one-word substitution:

	A security system that monitors and controls incoming and outgoing network traffic based on predetermined security rules.
	A hardware or software component that stores data to serve future requests more quickly.

	A set of rules governing the exchange of data between devices in a network.
	The smallest unit of data in computing, representing a binary digit (0 or 1).
	A network that connects computers and devices in a limited geographical area, such as an office or campus.
	A computer or system that provides resources, services, or data to other computers (clients) in a network.
	The delivery of computing services, including storage, processing power, and software, over the internet.
	Very negative person; somebody who always expects the worst to happen
	All-powerful; possessing complete power and authority
	The art of beautiful handwriting
	That which cannot be believed

Eponym

When a name becomes a word, it is called an eponym. The English language has many eponymous words.

Science, medicine, and the natural world are sources of many familiar eponyms.

The Importance of Using Eponyms:

Eponyms are the words that are named after the inventors, founders and scientists who have invented that concept, thing or process. They also highlight people who have characterized entire styles, eras, or studies.

1. Nicotine: A toxic, addictive liquid found in the tobacco plant

Jean Nicot (1530-1600) was a French ambassador to Portugal. He introduced tobacco to France and claimed it had healing properties. The addictive substance was later named after him.

2. Freudian Slip: A verbal mistake that may reveal a person's true beliefs, emotions or subconscious feelings. **Sigmund Freud** (1856-1939) was an Austrian psychologist and the founder of psychoanalysis. Freud believed that an error in speech revealed a hidden truth or motive.

Lets Learn More:

Eponym	Meaning	Origin
Atlas	a book of maps	The Greek God Atlas (the God of astronomy and navigation)
America	Continent	America takes its name from Italian explorer Amerigo Vespucci. While he may not have discovered America, he did point out that a new continent had been discovered, which influenced how the map was drawn in 1507.
Bluetooth	a technology standard used to enable short-range wireless communication between electronic devices.	Harald “Bluetooth” Gormsson (probably born c. 935), a King of Denmark and Norway.
Diesel	an internal combustion engine in which heat produced by the compression of air in the cylinder is used to ignite the fuel.	German-French mechanical engineer Rudolf Diesel invented the Diesel engine that bears his name.
Fahrenheit	a temperature scale in which the boiling point of water (212°F) and freezing point (32° F) are 180 degrees apart (today used mainly in the USA)	Gabriel Daniel Fahrenheit was a 17th-century physicist and inventor who invented the reliable thermometers and the Fahrenheit scale, which is named after him.

Watt	the unit of power	John Watt was a Scottish inventor who improved upon the steam engine technology of the time with his own Watt steam engine in 1776. Watt gave rise to the concept of horsepower, the SI unit of power and, of course, the watt.
Paparazzi	photographers who work independently and follow celebrities to get photographs of them, often in an intrusive way	The word comes from an Italian film, Fellini's "La Dolce Vita," and its photographer character, whose name is Paparazzo.
Herculean	The term herculean is used to describe an impossible task or something or someone characterized by great strength.	Hercules is one of the great heroes of Greek mythology.
Boolean algebra	This algebraic system is used in logic circuits and computer programming.	Named after George Boole
Von Neumann architecture	This is a computer architecture design model that describes a system where the CPU runs programs stored in memory.	Named after John von Neumann,
Turing machine	This abstract computational model defines the fundamental principles of computation.	Named after Alan Turing
Huffman coding	This algorithm is used for lossless data compression.	Named after David A. Huffman
Erdős number	This concept describes the "collaborative distance" in authorship of mathematical papers, extended into computer science research.	Named after mathematician Paul Erdős,
Bayesian networks	These networks represent a set of variables and their conditional dependencies via a directed acyclic graph.	Named after Thomas Bayes
Babbage machine	often considered the "father of the computer."	Named after Charles Babbage
Moore's Law	It predicts the doubling of transistors in an integrated circuit approximately every two years.	Named after Gordon Moore

Shannon entropy	This concept is used in information theory to quantify the amount of uncertainty in a set of outcomes	Named after Claude Shannon
-----------------	---	----------------------------

Exercise:

Explain the following eponyms:

1. Poincaré conjecture

2. RSA algorithm

3. Dijkstra's algorithm

4. P versus NP problem

5. Cray supercomputer

Listen to Understand

Objective:

To enhance the listening comprehension ability of the students through teaching effective strategies and to make them practice listening and answer exercises for further reinforcement.

Explanation:

Sharp listening comprehension ability is of paramount significance for professionals as they spend most of their time listening to a variety of people in their everyday professional careers. Meetings, interviews, presentations, seminars, conferences etc. are some of the situations that professionals encounter in their professional life. Listening to any oral content requires careful and conscious attempt on the part of the listener. Adequate vocabulary, good command over language, perfect understanding of various sentence structures, accents, stress patterns, tones (rising and falling) and proper interpretation skills etc. are the fundamental needs.

What does listening allow one to do?

The better you are at listening, the more productive you will be in your career – and more opportunities will come to you. Those who are most skilled at listening are able to better understand the work they have been given, as well as what is expected of them. Those who are unable to listen well, on the other hand, are more likely to fail when they are given an assignment.

If you are a good listener, you find it quite easy to establish positive working relationships with bosses, clients, as well as colleagues. Do you find that you have difficulty getting along with others in your profession, that people quite often avoid you? Then it might have a lot to do with how others perceive your listening skills. If you are perceived as a bad listener, then oftentimes people will try to avoid you altogether rather than spend the energy it requires to communicate complex matters to you. You might then find yourself missing out on a lot of opportunities that would come to you quite readily otherwise. With the growth and globalization of the education sector, it is becoming increasingly essential for students to take language tests like IELTS or TOEFL in order to secure admission to a foreign university for further studies. In this Tutorial, the students will practice IELTS Listening Tests. These tests consist of various oral conversations in which the students have to listen and attempt various questions. The following are some of the question types that are found in the IELTS Listening Section. Form Completion/Filling Table completion Sentence completion Labelling a diagram Multiple choice questions short answer questions Filling the gaps Matching the letters.

Form Completion/Filling	Multiple choice questions
Table completion	Short answer questions
Sentence completion	Filling the gaps
Labeling a diagram	Matching the letters

➤ Activity 1

Click on the following link to listen to the audio and fill up the blanks.

https://drive.google.com/file/d/1lO0UPEv8K19iQLN2KIlqIGiqPYJVPbFV/view?usp=drive_link

1. What would I do without your ____ mouth?
2. You've got my head spinning, no kidding, I can't ____ you down.
3. What's going on in that beautiful mind, I'm on your magical _____ ride.
4. And I'm so ____ don't know what hit me, but I'll be all right.
5. My ____ under water

➤ **Activity 2**

Watch the following TED talks and answer the following questions.

[The Disappearing Computer: An Exclusive Preview of Humane's Screenless Tech | Imran Chaudhri | TED - YouTube](#)

- 1. Write down any five important points discussed in a TED talk.**

- 2. Who is Imran Chaudhri?**

- 3. Write about the device that has been described in a TED talk.**

4. How will this innovation bring change in the way we interact?

[illegible]

Activity 3:

Watch the following TED talks and provide your insights in 50-60 words.

1. [ChatGPT– What does it mean for our future? | Tiffany Luu | TEDxYouth@WellspringSaigonSchool - YouTube](#)
2. [The Future of AI | Peter Graf | TEDxSonomaCounty - YouTube](#)
3. [Why AI Is Incredibly Smart and Shockingly Stupid | Yejin Choi | TED - YouTube](#)
4. [How I Overcame My Fear of Public Speaking | Danish Dhamani | TEDxKids@SMU - YouTube](#)

1. TED talk 1: ChatGPT- what does it mean for our future?

This image shows a blank sheet of white paper with horizontal ruling lines. The lines are evenly spaced and extend across the width of the page. There are no margins, text, or other markings on the paper.

This image shows a blank sheet of white paper with horizontal ruling lines. The lines are evenly spaced and extend across the width of the page. There are no margins, text, or other markings on the paper.

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

[illegible]

Activity: 4

Discuss with your classmates about the TED talks you have watched and write how listening to such TED talks improve your communication skills.

This image shows a blank sheet of white paper with horizontal ruling lines. The lines are evenly spaced and extend across the width of the page. There are no margins, text, or other markings on the paper.

LISTENING

SECTION 1

Questions 1–10

Complete the notes below.

Write NO MORE THAN THREE WORDS OR A NUMBER for each answer.

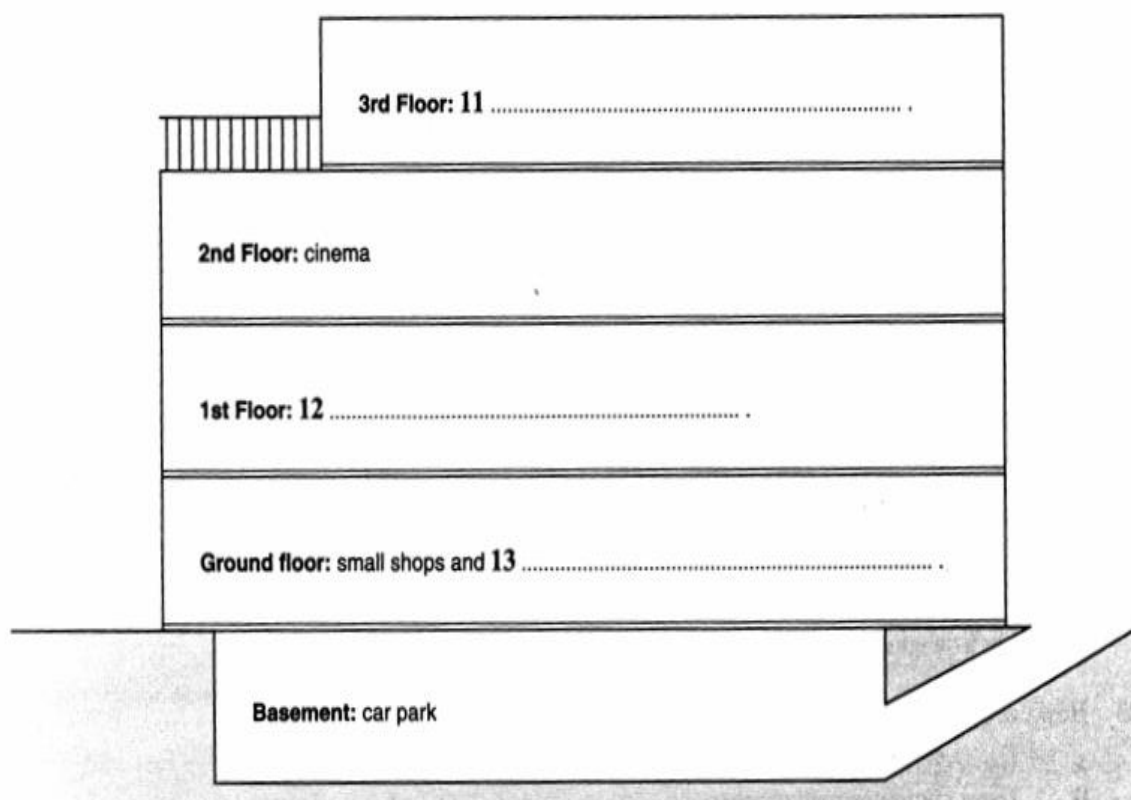

<i>Example</i>	<i>Answer</i>
Area of Interest:	<i>city centre</i>
Rents:	from 1 £ to £1000 per month.
Number of bedrooms required:	2
Apartment 1:	North Street rent: 3 £ per month. including 4
Apartment 2:	5 Road rent: £625 per month
Viewing arrangements:	meet 6 at 7 PLACE: 8 TIME: pm.
Also required:	Reference letter from 9 one month's rent deposit 10 £ contract fee

SECTION 2

Questions 11–20

Complete the information below.

Write **NO MORE THAN THREE WORDS OR A NUMBER** for each answer.

The beach will be 14

This will attract 15

The plans will be on display from Monday, 5th March until 16, 6th 17

Suggestions can be placed in the 18

The next meeting will be on April 19 th.

It will start at 20 pm.

SECTION 3

Questions 21–25

Choose the correct letter, **A**, **B** or **C**.

- 21 Maria's essay is
- A better than her previous one.
 - B not quite as good as her previous one.
 - C similar to her previous one.
- 22 The tutor is impressed by
- A the punctuation.
 - B the spelling.
 - C the style and choice of language.
- 23 The tutor feels that Maria's use of English is
- A generally acceptable.
 - B very poor.
 - C perfect.
- 24 How does Maria feel about this?
- A She's very sad.
 - B She's relieved.
 - C She's delighted.
- 25 How does the tutor suggest Maria can improve her spelling?
- A Use a dictionary.
 - B Use a computer spell checker.
 - C Avoid difficult-to-spell words.

Questions 26–30

What suggestions does the tutor make? Complete the list below with the correct letters, **A**, **B** or **C**.

- 26 The introduction
- 27 Information on the railways
- 28 The quotation from *The Times*.
- 29 The conclusion
- 30 The bibliography

A EXPAND IT
B REDUCE IT
C DELETE IT

SECTION 4

Questions 31 and 32

Choose the correct letters, A, B or C.

- 31 The main problem is
- A cats in towns.
 - B the poor condition of feral cats.
 - C public awareness.
- 32 Emergency veterinary treatment is provided by
- A the government.
 - B a small number of people.
 - C nobody.

Questions 33–39

Complete the sentences below using **NO MORE THAN THREE WORDS** for each answer.

- 33 Sterilisation is usually performed only on
- 34 Sterilisation is carried out in
- 35 Cats remain there for
- 36 To show that an animal has been sterilised, one

Ways of publicising the issue

METHOD	MESSAGE	WHEN
Poster campaign	"A kitten is not 37"	now
38	families may get bored with the responsibility of owning a pet	perhaps before next Christmas
newspaper advertisements	abandoned animals cause problems for other people	39

Question 40

Choose the correct letters, A, B or C.

- 40 A wider problem of feral cats is that they can
- A injure children.
 - B damage human health.
 - C become infested with parasites.

PRACTICE TEST - 2

<https://drive.google.com/file/d/1BNR2QumJqTbb->

Section 1

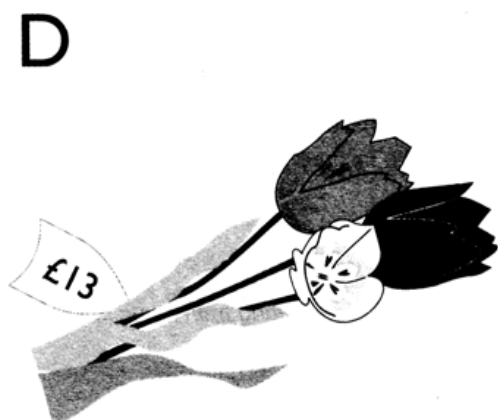

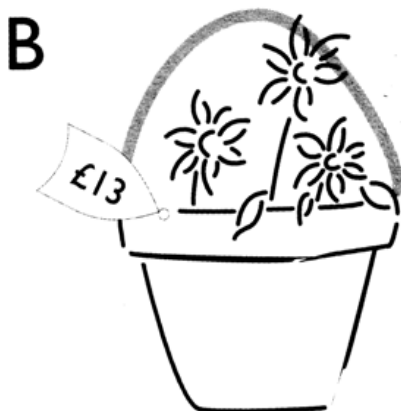

Questions 1–4

Circle the appropriate letter.

Example: *Angela would like to order*

- A some chocolates. ☒ C some chocolates and some flowers.
B some flowers. D some sweets.

1. Which picture shows the kind of flowers Angela would like to order?

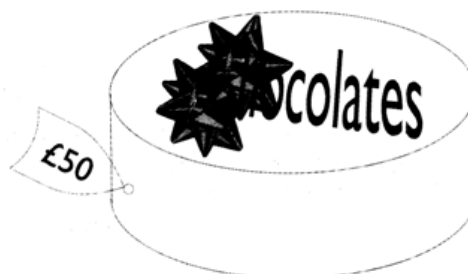

[btBnnm3TJ3tZtBEbS11/view?usp=drive_link](https://drive.google.com/file/d/1BNR2QumJqTbb-)

2. Which box of chocolates does Angela order?

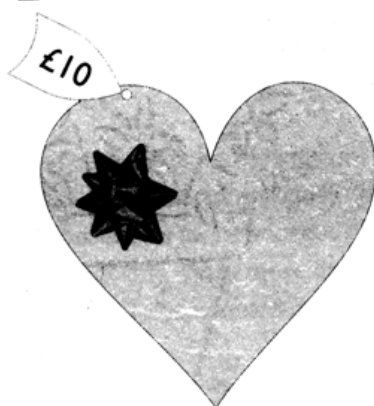

A

C

B

D

3. Angela would like to send

- A a mixture of chocolates, mostly liqueurs.
- B a box of liqueurs.
- C a mixture of chocolates, mostly white chocolates and some liqueurs.
- D a mixture of chocolates, mostly white, but no liqueurs.

4. The cost of delivering both items is

- A 90 pence
- B £38
- C £19
- D £9

Questions 5–10

Complete the following Order Form by USING NO MORE THAN THREE WORDS to complete each blank space:

ORDER FORM

Name: **Angela Love**
Address: **144a Orchard Heights
Marsh Drive
Edinburgh**

Telephone number: **0963 371 555**

Credit card number: **N/A**

Switch card number: **569 000 (5) 884 223 7**

Sendee's name: **Mrs (6)**
Sendee's address: **27 (7)
Cardiff CA13 8YU**

Message (if any): **Congratulations on (8) !
Just let me know when you are out on the road. Love Angie**

Any other details: **Delivery Date: (9)
(10) Deliver between and in the morning.**

Section 2

Questions 11–13

Circle the appropriate answer.

11. *Information about the sports facilities can be found on*
 A billboards in parts of the campus.
 B notice-boards throughout the campus.
 C posters in the campus.
 D maps all over the campus.
12. *The speaker is*
 A showing a map on a screen.
 B talking about a map in a leaflet.
 C referring to a diagram on a screen.
 D talking about a map on the wall.
13. *The university sports complex is*
 A in Burse Road.
 B on the right of the police station.
 C in Thames Street.
 D opposite the city library.

Questions 14–17

Identify **four** other facilities below which are mentioned as **future developments** in the university sports complex. One (C) has been marked for you as an example. Write your answers in Boxes 14–17 on your answer sheet. (Choose A–K as your answers for questions 14–17)

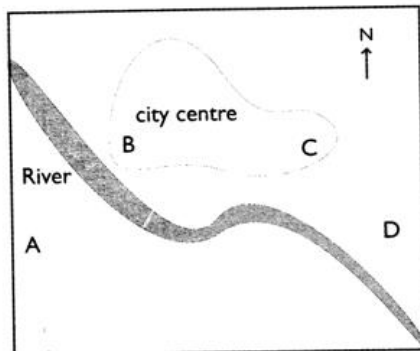

FACILITIES

- | | |
|---|-------------------------------|
| A Two badminton courts _____ | G An ice-skating rink _____ |
| B Three squash courts _____ | H A cafeteria _____ |
| C A sauna ☒ (Example) | I Two courts for tennis _____ |
| D A full-sized Olympic swimming pool _____ | J A soft-ball court _____ |
| E A dance theatre _____ | K A modern gym _____ |
| F A bar _____ | |

Questions 18–20

Circle the correct letter.

18. Choose the correct location (A, B, C, or D) for the sports ground on the map below.
 Sports ground = A, B, C, or D?

19. The direct bus to the sports field is the
 A 553 C 43
 B 33 D 53

20. The last bus at night is
 A around half past 12 in the morning.
 B at 2.30 a.m.
 C at 1.30 a.m.
 D at midnight.

Section 3

Questions 21–26

USING NO MORE THAN THREE WORDS for each space complete the details about the **FBT Award** below.

FBT Award

The FBT Award gives students money to ____21____.

Conditions to be met:

Applicants have to:

- be in their ____22____ year.
- be a British or Commonwealth citizen.
- be among the ____23____ in their year in the final exams.
- hand in the application by the ____24____.
- be under ____25____ at the end of their course.
- give the names of ____26____ referees.

Questions 27–30

Circle the appropriate answer.

27. *The award Sandra is applying for is*
- A awarded twice a year.
 - B not as hard to get as the one Derek is after.
 - C not for as much money as the FBT Award.
 - D much harder to obtain than the one Derek is after.
28. *To apply for the Bisiker Award, students have to*
- A write a 5,000 word outline of their project and complete a detailed application form.
 - B write a 5,000 word outline of their project and complete a form with their details.
 - C fill in a short application form.
 - D write a 50,000 word outline of their project and fill in a form with their details.
29. *The lecturer puts great emphasis on*
- A the need for the summary to be original.
 - B making five copies of the application.
 - C having it read through by someone before submitting it.
 - D studying previous applications.
30. *The lecturer also lays great emphasis on the fact that*
- A the Bisiker Award is not much harder to get than the one Derek is after.
 - B the application should, if possible, be typed, neat and bound with a ring binder.
 - C there is no need to type the application.
 - D the application has to be typed, be very neat and bound with a ring binder.

Section 4

Questions 31–36

Complete the lecture notes below. Use NO MORE THAN THREE WORDS to complete each space.

Europe goes grey

refers to the _____ 31 _____ in Europe since the 60s.

Projections

- by 2029 approximately _____ 32 _____ % of the UK population will be over retirement age.
- roughly 23% of the population of _____ 33 _____ will be 65 or over by 2020.
- the number of centenarians in the UK will be increasing by _____ 34 _____ percent per year in the 21st century.

Reasons for increased life-span:

- a. better diet
- b. better housing
- c. the _____ 35 _____ of health care

The birth rate in Europe has fallen as a consequence of:

- a. _____ 36 _____
- b. education of women
- c. more women working

Questions 37–40

Circle the correct letter.

37. *The speaker says that the elderly*

- A generally need care.
- B can be both happy and retired.
- C vary in their situations and needs.
- D worry about who will care for them.

38. *Unlike in the past, today families*

- A don't care about their grandparents.
- B tend to live in the same area.
- C don't take care of grandparents.
- D share the care of the elderly.

39. *As regards the elderly, financial assistance is needed to*

- A pay the wages of carers.
- B help independent old people.
- C create new medical services.
- D increase the level of pensions.

40. *The speaker suggests that in the future*

- A people should be helped to prepare financially for their old age.
- B existing houses of the elderly should be adapted.
- C retirement ages should be increased.
- D people should respect the elderly more.

READING SKILLS

Objective:

To teach and train the students for Reading Comprehension by effective application of various effective reading comprehension techniques so as to enable them to read and comprehend various types of texts they may encounter in their student as well as professional career.

Explanation:

Sharp and effective reading comprehension skills are a must for the professionals as well as the students. Professionals have to read various types of letters, emails, notifications, newspapers, reports, business proposals, press releases and so on in their everyday professional career for making decisions and managing resources. The students of professional courses, on the other hand, are expected to read and comprehend diverse texts as a part of their academic requirements. These diverse texts may belong to literature, scientific research, technical advancements, research activities, market surveys, different types of reports etc. For both above categories of people, it is imperative that one must have sharp skills of **skimming, scanning, punctuations, paraphrasing and summarizing**. Reading comprehension is almost impossible in the absence of adequate knowledge of these skills.

In addition to this, the reader is expected to have adequate vocabulary, good command over language, knowledge of parts of speech, perfect understanding of sentence structures, verb forms (tenses), proper interpretation skill etc. With globalization of the education sector, it is becoming increasingly essential for the students to take up international language tests like IELTS, TOEFL, PTE, TOEIC etc. in order to realize their dream of pursuing higher education in reputed foreign universities.

The Practice Tests included in this Tutorial aim at assessing and improving the students' ability to read and comprehend various texts. The student will be exposed to various texts based on which the student will be expected to attempt the following question types.

Reading for Specific Information

Multiple Choices

Short Answer Questions

Yes, No and Not Given

True, False and Not Given

Sentence Completion

Gap fill

Summary Completion,

Form Filling

Table Completion etc.

The exercises covered in this Tutorial have been adopted from various international language tests so as to impart first-hand experience to the students. The objective is to teach various required strategies to enable the students to achieve cent percent success in the Reading section of such tests.

Activity:1

Watch the video and understand Skimming and Scanning

[TYPES OF READING | Scanning Skimming Intensive Extensive | Reading Comprehension | ELC - YouTube](#)

Read the following blog and skim and scan the information to write in the table given below the blog.

Heimdal Cyber-Security & Threat Intelligence Report 2022-2023 by VLADIMIR UNTERFINGER

Glancing back at 2022's Cyber Threats

The “new normal” foisted upon organizations as they accommodate a remote workforce has left them vulnerable to new **attack vectors** and facing huge alterations in the threat landscape, according to our annual Threat Report.

Worms, Trojans, and infected JS malware were the ones our **SOC Team** encountered most often. Although these varieties of **malware** often appear legitimate, they are actually designed to destroy, disrupt, or steal data, and they can quickly seize control of a device.

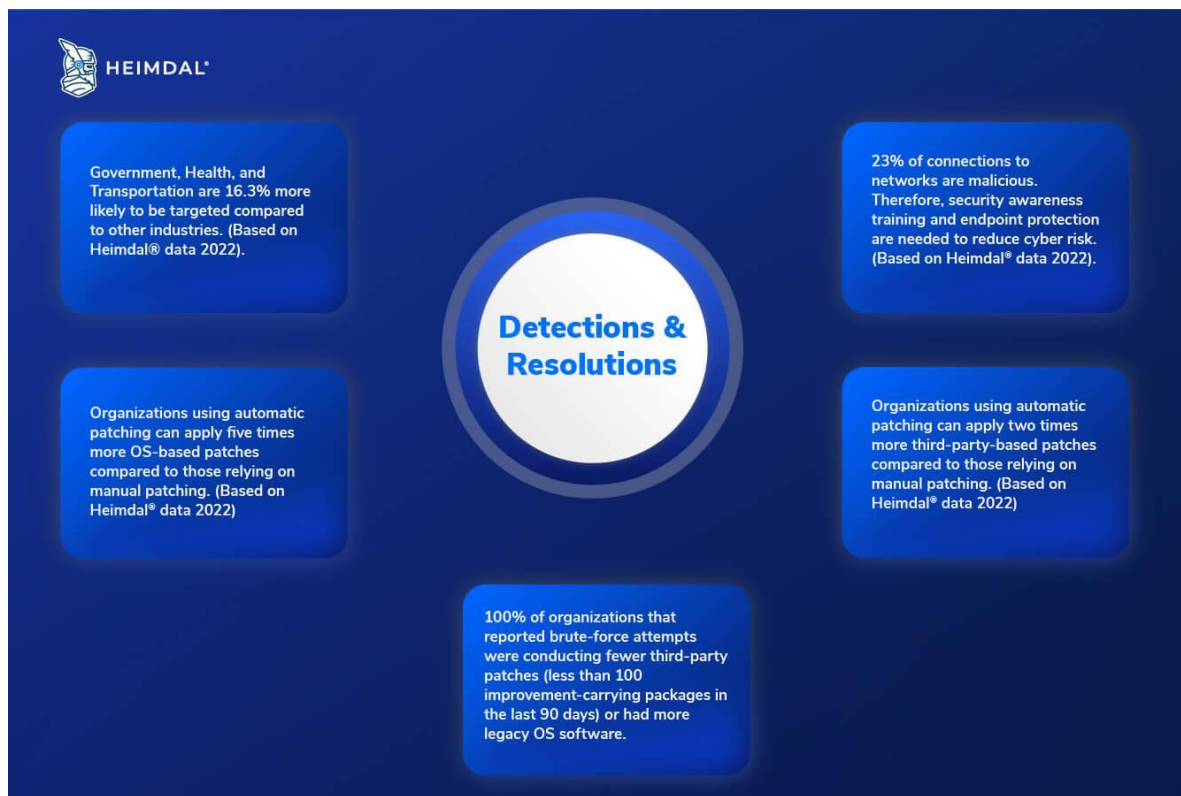

Looking more closely at how the cybersecurity landscape altered in 2022, we couldn't help but notice that our clients have successfully been safeguarded from major cyber events thanks to our unified corporate security suite.

Without further ado, here's a sneak peek of what Heimdal®'s 2023 Cyber-Security & Threat Intelligence Report brings to the table. We tackled the main areas of last year's cybersecurity interests by putting together a list of:

Most Important Cyberattacks, The Most Powerful Statistics of 2022, Threatscape Predictions for 2023.

Cyber Threat Report 2023 Key Takeaways

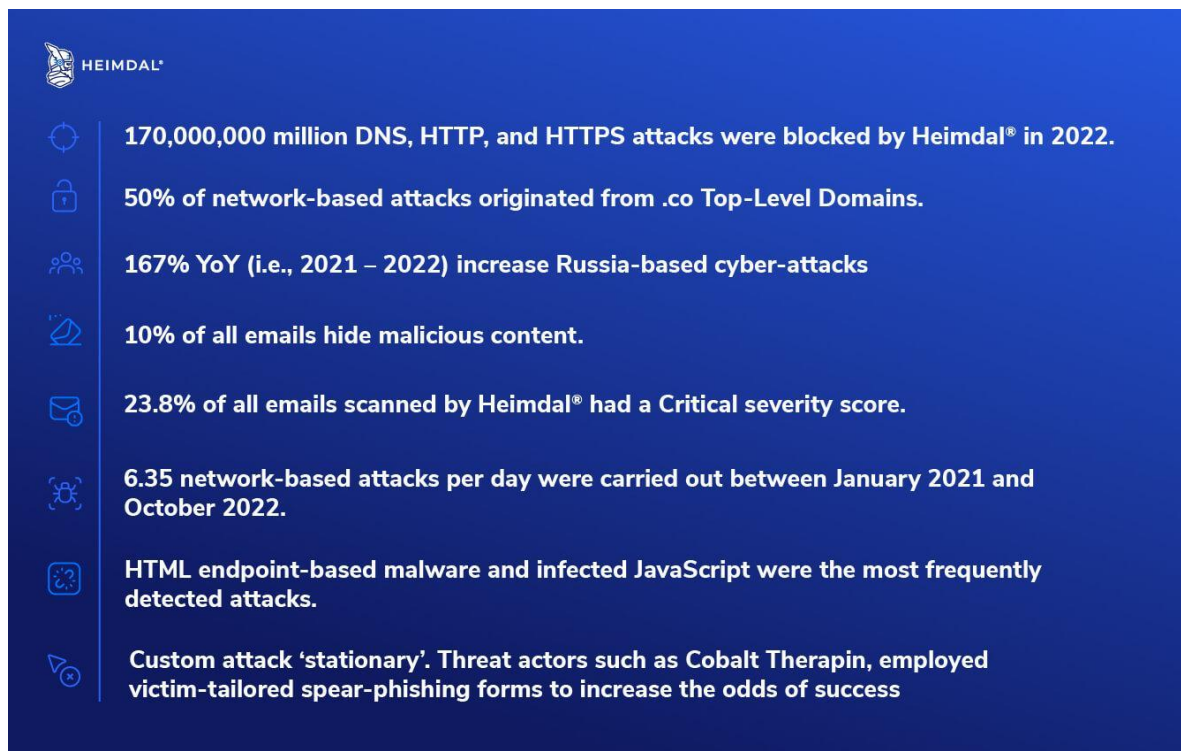

- **100% of organizations** that reported brute-force attempts were conducting fewer third-party patches (less than 100 improvement-carrying packages in the last 90 days) or had more legacy OS software.
- **Government, Health, and Transportation are 16.3% more likely to be targeted** compared to other industries. (Based on Heimdal® data 2022).
- **23% of connections to networks are malicious.** Therefore, security awareness training and **endpoint protection** are needed to reduce cyber risk. (Based on Heimdal® data 2022).
- Organizations using **automatic patching can apply five times more OS-based patches** compared to those relying on manual patching. (Based on Heimdal® data 2022)
- Organizations using **automatic patching** can apply **two times more third-party-based patches** compared to those relying on manual patching. (Based on Heimdal® data 2022).

Detections & resolutions

- **170,000,000 million DNS, HTTP, and HTTPS attacks** were blocked by Heimdal® in 2022.

- **50% of network-based attacks** originated from .co Top-Level Domains.
- **167% YoY** (i.e., 2021 – 2022) increase Russia-based cyberattacks.
- **10% of all emails** hide malicious content.
- **23.8% of all emails** scanned by Heimdal® had a Critical severity score.
- **6.35 network-based attacks per day** were carried out between January 2021 and October 2022.
- **HTML endpoint-based malware** and **infected JavaScript** were the most frequently detected attacks.
- **Custom attack ‘stationary’**. Threat actors such as Cobalt Therapin, employed victim-tailored spear-phishing forms to increase the odds of success.

Key Predictions of Cyber Threats and Trends for 2023

- Centralized cybersecurity architectures will replace point-based solutions.
- Overemphasis on tool automation and asset visibility.
- **SOAR and SIEM** hybridization to replace conventional threat-hunting tools and approaches.
- HVTs, MSPs in particular, will face additional challenges in protecting against multi-surface attacks.

- ‘Web of Ransomware’ will make it difficult for authorities to track down cyber-criminals.
- Time vs. effect. Attackers will spend more time staging attacks in order to increase likelihood of success.
- Russia – Ukraine conflict to become a breeding ground for cyber-criminals.
- A rise in state-sponsored cyberespionage.
- Deepfakes play a key role in social engineering.

Identifying Specific Information

Look at the information about swimming classes. Then answer the questions below.

Camberwell College Swimming Classes.

It's an essential life skill, it can make you fit and it provides fun for all the family. Camberwell College's offers swimming classes whatever for your needs, whether you want to swim competitively, you are trying to stay healthy or you want to learn.

We offer separate classes for adults and children, following the National Plan for Teaching Swimming (NPTS). We will guide you from your first splash and help you develop your confidence in the water.

Swim-A-Long

This class is suitable for parents with children aged up to the age of 1.5 years. This class allows very young children to gain confidence in the water, by way of songs and music.

Tadpole to Frog Classes

This series of classes is suitable for children aged 1.5 upwards. There are six levels in the series. The first level is suitable for non-swimmers and teaches basic techniques and safety, using aids and floats. By the time students reach the sixth level, they will be able to swim independently and will be eligible to join the Swim Star classes.

Swim Star

An opportunity for able swimmers to earn the Bronze, Silver and Gold swimming awards. These classes teach children the ability to swim for prolonged periods of time, and teach skills such as diving, turning and different strokes. Children who successfully complete the Swim Star programme will be invited to join the Youth Squad and learn competitive swimming techniques.

Swim School

The swim school offers classes for adults. There are three levels, beginner, intermediate and advanced. The beginner's class is suitable for people who are new to swimming; the intermediate level is designed for swimmers who want to brush up on their swimming style, and the advanced level offers in-depth advice on stamina, breathing and technique.

Aqua Health

We offer a range of levels of fitness classes for able swimmers who wish to keep fit, socialize and have fun to music. An aqua-Light offers gentle exercise and is suitable for the elderly. Aqua-Pump is a high energy class which builds your strength and tones your body.

Select a suitable swimming class for the people below. In-case of irrelevant information, write NO CLASSES AVAILABLE as your answer.

1. A 5 year-old who is unable to swim
2. A mother who wants to introduce her baby to the water
3. A middle-aged person who can swim quite well but wants to improve his techniques
4. A teenager who is interested in swimming in competitions
5. An old man who wants to keep fit and meet people
6. A child who wants to be able to swim longer distances
7. A strong adult swimmer who wishes to learn complex skills
8. A woman who wants to learn to swim by using music

READING

READING PASSAGE 1

You should spend about 20 minutes on **Questions 1-14** which are based on Reading Passage 1 on the following pages.

Questions 1-4

Reading Passage 1 has six paragraphs **A-F**.

Choose the most suitable headings for paragraphs **B-E** from the list of headings below.

Write the appropriate numbers **i-ix** in boxes 1-4 on your answer sheet.

List of Headings	
i	How the reaction principle works
ii	The impact of the reaction principle
iii	Writers' theories of the reaction principle
iv	Undeveloped for centuries
v	The first rockets
vi	The first use of steam
vii	Rockets for military use
viii	Developments of fire
ix	What's next?

<i>Example</i> Paragraph A	Answer ii
-------------------------------	---------------------

1 Paragraph B

2 Paragraph C

3 Paragraph D

4 Paragraph E

<i>Example</i> Paragraph F	Answer ix
-------------------------------	---------------------

THE ROCKET - FROM EAST TO WEST

- A** The concept of the rocket, or rather the mechanism behind the idea of propelling an object into the air, has been around for well over two thousand years. However, it wasn't until the discovery of the reaction principle, which was the key to space travel and so represents one of the great milestones in the history of scientific thought, that rocket technology was able to develop. Not only did it solve a problem that had intrigued man for ages, but, more importantly, it literally opened the door to exploration of the universe.
- B** An intellectual breakthrough, brilliant though it may be, does not automatically ensure that the transition is made from theory to practice. Despite the fact that rockets had been used sporadically for several hundred years, they remained a relatively minor artefact of civilisation until the twentieth century. Prodigious efforts, accelerated during two world wars, were required before the technology of primitive rocketry could be translated into the reality of sophisticated astronauts. It is strange that the rocket was generally ignored by writers of fiction to transport their heroes to mysterious realms beyond the Earth, even though it had been commonly used in fireworks displays in China since the thirteenth century. The reason is that nobody associated the reaction principle with the idea of travelling through space to a neighbouring world.
- C** A simple analogy can help us to understand how a rocket operates. It is much like a machine gun mounted on the rear of a boat. In reaction to the backward discharge of bullets, the gun, and hence the boat, move forwards. A rocket motor's 'bullets' are minute, high-speed particles produced by burning propellants in a suitable chamber. The reaction to the ejection of these small particles causes the rocket to move forwards. There is evidence that the reaction principle was applied practically well before the rocket was invented. In his *Noctes Atticae* or *Greek Nights*, Aulus Gellius describes 'the pigeon of Archytas', an invention dating back to about 360 BC. Cylindrical in shape, made of wood, and hanging from string, it was moved to and fro by steam blowing out from small exhaust ports at either end. The reaction to the discharging steam provided the bird with motive power.
- D** The invention of rockets is linked inextricably with the invention of 'black powder'. Most historians of technology credit the Chinese with its discovery. They base their belief on studies of Chinese writings or on the notebooks of early Europeans who settled in or made long visits to China to study its history and civilisation. It is probable that, some time in the tenth century, black powder was first compounded from its basic ingredients of saltpetre, charcoal and sulphur. But this does not mean that it was immediately used to propel rockets. By the thirteenth century, powder-propelled fire arrows had become rather common. The Chinese relied on this type of technological development to produce incendiary projectiles of many sorts,

explosive grenades and possibly cannons to repel their enemies. One such weapon was the 'basket of fire' or, as directly translated from Chinese, the 'arrows like flying leopards'. The 0.7 metre-long arrows, each with a long tube of gunpowder attached near the point of each arrow, could be fired from a long, octagonal-shaped basket at the same time and had a range of 400 paces. Another weapon was the 'arrow as a flying sabre', which could be fired from crossbows. The rocket, placed in a similar position to other rocket-propelled arrows, was designed to increase the range. A small iron weight was attached to the 1.5m bamboo shaft, just below the feathers, to increase the arrow's stability by moving the centre of gravity to a position below the rocket. At a similar time, the Arabs had developed the 'egg which moves and burns'. This 'egg' was apparently full of gunpowder and stabilised by a 1.5m tail. It was fired using two rockets attached to either side of this tail.

- E It was not until the eighteenth century that Europe became seriously interested in the possibilities of using the rocket itself as a weapon of war and not just to propel other weapons. Prior to this, rockets were used only in pyrotechnic displays. The incentive for the more aggressive use of rockets came not from within the European continent but from far-away India, whose leaders had built up a corps of rocketeers and used rockets successfully against the British in the late eighteenth century. The Indian rockets used against the British were described by a British Captain serving in India as 'an iron envelope about 200 millimetres long and 40 millimetres in diameter with sharp points at the top and a 3m-long bamboo guiding stick'. In the early nineteenth century the British began to experiment with incendiary barrage rockets. The British rocket differed from the Indian version in that it was completely encased in a stout, iron cylinder, terminating in a conical head, measuring one metre in diameter and having a stick almost five metres long and constructed in such a way that it could be firmly attached to the body of the rocket. The Americans developed a rocket, complete with its own launcher, to use against the Mexicans in the mid-nineteenth century. A long cylindrical tube was propped up by two sticks and fastened to the top of the launcher, thereby allowing the rockets to be inserted and lit from the other end. However, the results were sometimes not that impressive as the behaviour of the rockets in flight was less than predictable.
- F Since then, there have been huge developments in rocket technology, often with devastating results in the forum of war. Nevertheless, the modern day space programs owe their success to the humble beginnings of those in previous centuries who developed the foundations of the reaction principle. Who knows what it will be like in the future?

Questions 5 and 6

Choose the appropriate letters **A-D** and write them in boxes 5 and 6 on your answer sheet.

- 5 The greatest outcome of the discovery of the reaction principle was that
A rockets could be propelled into the air.
B space travel became a reality.
C a major problem had been solved.
D bigger rockets were able to be built.
- 6 According to the text, the greatest progress in rocket technology was made
A from the tenth to the thirteenth centuries.
B from the seventeenth to the nineteenth centuries.
C from the early nineteenth to the late nineteenth century.
D from the late nineteenth century to the present day.

Questions 7-10

From the information in the text, indicate who **FIRST** invented or used the items in the list below.

Write the appropriate letters **A-E** in boxes 7-10 on your answer sheet.

NB You may use any letter more than once.

Example	Answer
rockets for displays	A

- 7 black powder
- 8 rocket-propelled arrows for fighting
- 9 rockets as war weapons
- 10 the rocket launcher

FIRST invented or used by
A the Chinese
B the Indians
C the British
D the Arabs
E the Americans

Questions 11-14

Look at the drawings of different projectiles below, **A-H**, and the names of types of projectiles given in the passage, **Questions 11-14**. Match each name with one drawing.

Write the appropriate letters **A-H** in boxes 11-14 on your answer sheet.

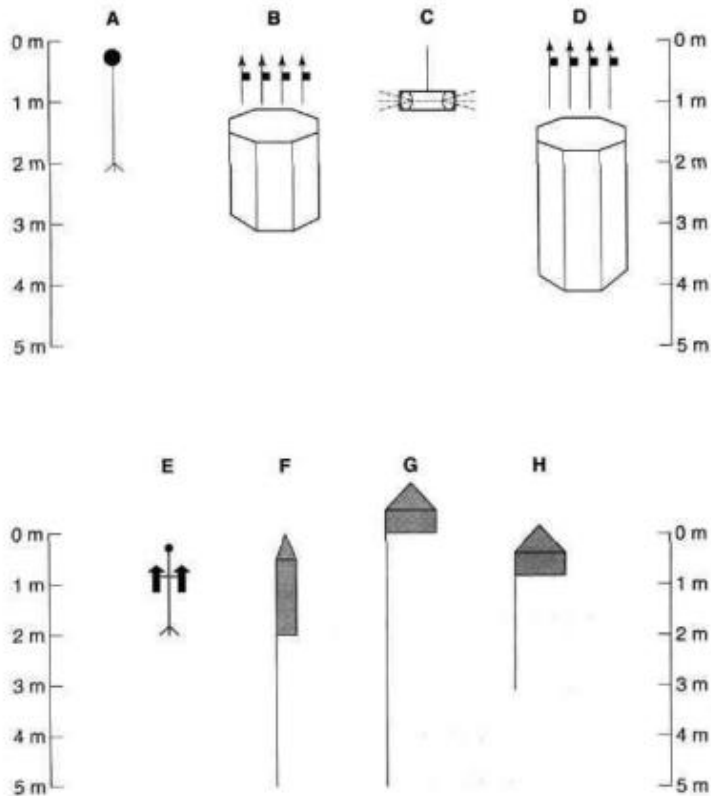

Example

The Greek 'pigeon of Archytas'

Answer

C

- 11 The Chinese 'basket of fire'
- 12 The Arab 'egg which moves and burns'
- 13 The Indian rocket
- 14 The British barrage rocket

READING PASSAGE 2

You should spend about 20 minutes on Questions 15-28 which are based on Reading Passage 2 below.

The Risks of Cigarette Smoke

Discovered in the early 1800s and named nicotianine, the oily essence now called nicotine is the main active ingredient of tobacco. Nicotine, however, is only a small component of cigarette smoke, which contains more than 4,700 chemical compounds, including 43 cancer-causing substances. In recent times, scientific research has been providing evidence that years of cigarette smoking vastly increases the risk of developing fatal medical conditions.

In addition to being responsible for more than 85 per cent of lung cancers, smoking is associated with cancers of, amongst others, the mouth, stomach and kidneys, and is thought to cause about 14 per cent of leukemia and cervical cancers. In 1990, smoking caused more than 84,000 deaths, mainly resulting from such problems as pneumonia, bronchitis and influenza. Smoking, it is believed, is responsible for 30 per cent of all deaths from cancer and clearly represents the most important preventable cause of cancer in countries like the United States today.

Passive smoking, the breathing in of the side-stream smoke from the burning of tobacco between puffs or of the smoke exhaled by a smoker, also causes a serious health risk. A report published in 1992 by the US Environmental Protection Agency (EPA) emphasized the health dangers, especially from side-stream smoke. This type of smoke contains more, smaller particles and is therefore more likely to be deposited deep in the lungs. On the basis of this report, the EPA has classified environmental tobacco smoke in the highest risk category for causing cancer.

As an illustration of the health risks, in the case of a married couple where one partner is a smoker and one a non-smoker, the latter is believed to have a 30 per cent higher risk of death from heart disease because of passive smoking. The risk of lung cancer also increases over the years of exposure and the figure jumps to 80 per cent if the spouse has been smoking four packs a day for 20 years. It has been calculated that 17 per cent of cases of lung cancer can be attributed to high levels of exposure to second-hand tobacco smoke during childhood and adolescence.

A more recent study by researchers at the University of California at San Francisco (UCSF) has shown that second-hand cigarette smoke does more harm to non-smokers than to smokers. Leaving aside the philosophical question of whether anyone should have to breathe someone else's cigarette smoke, the report suggests that the smoke experienced by many people in their daily lives is enough to produce substantial adverse effects on a person's heart and lungs.

The report, published in the Journal of the American Medical Association (AMA), was based on the researchers' own earlier research but also includes a review of studies over the past few years. The American Medical Association represents about half of all US doctors and is a strong opponent of smoking. The study suggests that people who smoke cigarettes are continually damaging their cardiovascular system, which adapts in order to compensate for the effects of smoking. It further states that people who do not smoke do not have the benefit of their system adapting to the smoke inhalation. Consequently, the effects of passive smoking are far greater on non-smokers than on smokers.

This report emphasizes that cancer is not caused by a single element in cigarette smoke; harmful effects to health are caused by many components. Carbon monoxide, for example, competes with oxygen in red blood cells and interferes with the blood's ability to deliver life-giving oxygen to the heart. Nicotine and other toxins in cigarette smoke activate small blood cells called platelets, which increases the likelihood of blood clots, thereby affecting blood circulation throughout the body.

The researchers criticize the practice of some scientific consultants who work with the tobacco industry for assuming that cigarette smoke has the same impact on smokers as it does on non-smokers. They argue that those scientists are underestimating the damage done by passive smoking and, in support of their recent findings, cite some previous research which points to passive smoking as the cause for between 30,000 and 60,000 deaths from heart attacks each year in the United States. This means that passive smoking is the third most preventable cause of death after active smoking and alcohol-related diseases.

The study argues that the type of action needed against passive smoking should be similar to that being taken against illegal drugs and AIDS (SIDA). The UCSF researchers maintain that the simplest and most cost-effective action is to establish smoke-free work places, schools and public places.

Questions 15-17

Choose the appropriate letters **A—D** and write them in boxes 15—17 on your answer sheet.

- 15** According to information in the text, leukaemia and pneumonia
- A** are responsible for 84,000 deaths each year.
 - B** are strongly linked to cigarette smoking.
 - C** are strongly linked to lung cancer.
 - D** result in 30 per cent of deaths per year.
- 16** According to information in the text, intake of carbon monoxide
- A** inhibits the flow of oxygen to the heart.
 - B** increases absorption of other smoke particles.
 - C** inhibits red blood cell formation.
 - D** promotes nicotine absorption.
- 17** According to information in the text, intake of nicotine encourages
- A** blood circulation through the body.
 - B** activity of other toxins in the blood.
 - C** formation of blood clots.
 - D** an increase of platelets in the blood.

Questions 18-21

Do the following statements reflect the claims of the writer in Reading Passage 2?

In boxes 18-21 on your answer sheet write

YES if the statement reflects the claims of the writer
NO if the statement contradicts the claims of the writer
NOT GIVEN if it is impossible to say what the writer thinks about this

- 18** Thirty per cent of deaths in the United States are caused by smoking-related diseases.
- 19** If one partner in a marriage smokes, the other is likely to take up smoking.
- 20** Teenagers whose parents smoke are at risk of getting lung cancer at some time during their lives.
- 21** Opponents of smoking financed the UCSF study.

Questions 22-24

Choose **ONE** phrase from the list of phrases **A—J** below to complete each of the following sentences (Questions 22-24).

Write the appropriate letters in boxes 22—24 on your answer sheet.

- 22 Passive smoking ...
- 23 Compared with a non-smoker, a smoker ...
- 24 The American Medical Association ...

- A** includes reviews of studies in its reports.
- B** argues for stronger action against smoking in public places.
- C** is one of the two most preventable causes of death.
- D** is more likely to be at risk from passive smoking diseases.
- E** is more harmful to non-smokers than to smokers.
- F** is less likely to be at risk of contracting lung cancer.
- G** is more likely to be at risk of contracting various cancers.
- H** opposes smoking and publishes research on the subject.
- I** is just as harmful to smokers as it is to non-smokers.
- J** reduces the quantity of blood flowing around the body.

Questions 25-28

Classify the following statements as being

- A** a finding of the UCSF study
- B** an opinion of the UCSF study
- C** a finding of the EPA report
- D** an assumption of consultants to the tobacco industry

Write the appropriate letters **A—D** in boxes 25—28 on your answer sheet.

NB You may use any letter more than once.

- 25 Smokers' cardiovascular systems adapt to the intake of environmental smoke.
- 26 There is a philosophical question as to whether people should have to inhale others' smoke.
- 27 Smoke-free public places offer the best solution.
- 28 The intake of side-stream smoke is more harmful than smoke exhaled by a smoker.

READING PASSAGE 3

You should spend about 20 minutes on **Questions 29-40** which are based on Reading Passage 3 on the following pages.

Questions 29-33

Reading Passage 3 has seven paragraphs **A-G**.

Choose the most suitable headings for paragraphs **C-G** from the list of headings below.

Write the appropriate numbers *i-x* in boxes 29-33 on your answer sheet.

List of Headings	
i	The Crick and Watson approach to research
ii	Antidotes to bacterial infection
iii	The testing of hypotheses
iv	Explaining the inductive method
v	Anticipating results before data is collected
vi	How research is done and how it is reported
vii	The role of hypotheses in scientific research
viii	Deducing the consequences of hypotheses
ix	Karl Popper's claim that the scientific method is hypothetico-deductive
x	The unbiased researcher

Example	Answer
Paragraph A	ix

- 29 Paragraph C
30 Paragraph D
31 Paragraph E
32 Paragraph F
33 Paragraph G

SCIENTIFIC METHOD

- A** 'Hypotheses,' said Medawar in 1964, 'are imaginative and inspirational in character'; they are 'adventures of the mind'. He was arguing in favour of the position taken by Karl Popper in *The Logic of Scientific Discovery* (1972, 3rd edition) that the nature of scientific method is hypothetico-deductive and not, as is generally believed, inductive.
- B** It is essential that you, as an intending researcher, understand the difference between these two interpretations of the research process so that you do not become discouraged or begin to suffer from a feeling of 'cheating' or not going about it the right way.
- C** The myth of scientific method is that it is inductive: that the formulation of scientific theory starts with the basic, raw evidence of the senses - simple, unbiased, unprejudiced observation. Out of these sensory data - commonly referred to as 'facts' — generalisations will form. The myth is that from a disorderly array of factual information an orderly, relevant theory will somehow emerge. However, the starting point of induction is an impossible one.
- D** There is no such thing as an unbiased observation. Every act of observation we make is a function of what we have seen or otherwise experienced in the past. All scientific work of an experimental or exploratory nature starts
- with some expectation about the outcome. This expectation is a hypothesis. Hypotheses provide the initiative and incentive for the inquiry and influence the method. It is in the light of an expectation that some observations are held to be relevant and some irrelevant, that one methodology is chosen and others discarded, that some experiments are conducted and others are not. Where is, your naive, pure and objective researcher now?
- E** Hypotheses arise by guesswork, or by inspiration, but having been formulated they can and must be tested rigorously, using the appropriate methodology. If the predictions you make as a result of deducing certain consequences from your hypothesis are not shown to be correct then you discard or modify your hypothesis. If the predictions turn out to be correct then your hypothesis has been supported and may be retained until such time as some further test shows it not to be correct. Once you have arrived at your hypothesis, which is a product of your imagination, you then proceed to a strictly logical and rigorous process, based upon deductive argument — hence the term 'hypothetico-deductive'.

F So don't worry if you have some idea of what your results will tell you before you even begin to collect data; there are no scientists in existence who really wait until they have all the evidence in front of them before they try to work out what it might possibly mean. The closest we ever get to this situation is when something happens by accident; but even then the researcher has to formulate a hypothesis to be tested before being sure that, for example, a mould might prove to be a successful antidote to bacterial infection.

G The myth of scientific method is not only that it is inductive (which we have seen is incorrect) but also that the hypothetico-deductive method proceeds in a step-by-step, inevitable fashion. The hypothetico-deductive method describes the *logical* approach to much research work, but it does not describe the *psychological* behaviour that brings it about. This is much more holistic — involving guesses, reworkings, corrections, blind alleys and above all inspiration, in the deductive as well as the hypothetic component — than is immediately apparent from reading the final thesis or published papers. These have been, quite properly, organised into a more serial, logical order so that the worth of the *output* may be evaluated independently of the behavioural processes by which it was obtained. It is the difference, for example between the academic papers with which Crick and Watson demonstrated the structure of the DNA molecule and the fascinating book *The Double Helix* in which Watson (1968) described how they did it. From this point of view, 'scientific method' may more usefully be thought of as a way of *writing up* research rather than as a way of carrying it out.

Questions 34 and 35

In which **TWO** paragraphs in Reading Passage 3 does the writer give advice **directly** to the reader?

*Write the **TWO** appropriate letters (A—G) in boxes 34 and 35 on your answer sheet.*

Questions 36-39

Do the following statements reflect the opinions of the writer in Reading Passage 3?

In boxes 36-39 on your answer sheet write

YES *if the statement reflects the opinion of the writer*
NO *if the statement contradicts the opinion of the writer*
NOT GIVEN *if it is impossible to say what the writer thinks about this*

- 36 Popper says that the scientific method is hypothetico-deductive.
37 If a prediction based on a hypothesis is fulfilled, then the hypothesis is confirmed as true.
38 Many people carry out research in a mistaken way.
39 The 'scientific method' is more a way of describing research than a way of doing it.

Question 40

Choose the appropriate letter A-D and write it in box 40 on your answer sheet.

Which of the following statements best describes the writer's main purpose in Reading Passage 3?

- A** to advise Ph.D students not to cheat while carrying out research
B to encourage Ph.D students to work by guesswork and inspiration
C to explain to Ph.D students the logic which the scientific research paper follows
D to help Ph.D students by explaining different conceptions of the research process

Read the following article and complete the KWL table.

Praggnanandhaa's fairytale story continues: From Asian Champion at six to World Cup runner-up at 18

Meet Rameshbabu Praggnanandhaa, the chess prodigy who rose from a young enthusiast to the Chess World Cup runner-up at the age of 18, showcasing his exceptional talent and inspiring aspiring players worldwide.

Rameshbabu Praggnanandhaa, also known as Pragg, may have fallen short of becoming the youngest Chess World Cup champion, but the Indian prodigy has definitely captured the attention of the chess world with his remarkable skills in the intensely fought final against World No.1 and eventual champion Magnus Carlsen.

Carlsen won the FIDE World Cup for the first time on Thursday, after three days and four games of intensely tense chess across two formats. In the final, he defeated India's Praggnanandhaa, but not before the 18-year-old teenage prodigy dragged him through the tie-breaker. Carlsen was declared the winner after the second game of the tiebreaker. On Tuesday and Wednesday, the two players had one draw each.

Regardless of the final result, the FIDE World Cup was a memorable event for the teenager from Chennai because he also qualified for the prestigious Candidates Tournament, which is held to find a challenger for world champion Ding Liren in the next world chess championship battle. Pragg, who turned 18 during the World Cup, was the youngest World Cup finalist and winner in history. Pragg, who is seeded 31, is also the lowest seed to reach the World Cup final.

Praggnanandhaa's journey to Chess greatness

Born on August 10, 2005, in Chennai, India, Praggnanandhaa's passion for chess arose when he was just two years old, inspired by his older sister, Vaishali, who later achieved the title of grandmaster in 2018 and international master in 2021.

Praggnanandhaa made a splash in his early years with impressive accomplishments. At the age of six, he secured second place in the under-7 Indian championships and took home the gold at the Asian Championships. He continued his winning streak by clinching the World Youth Chess Championships titles for under-8s and under-10s.

His exceptional talent was duly recognized when he became an international master at the

age of 10, making him the youngest-ever achiever of this title. Just two years later, at the age of 12, Praggnanandhaa attained the grandmaster title, becoming the second-youngest grandmaster at that time.

Praggnanandhaa's success story continued as he emerged victorious in the Xtracon Chess Open held in Denmark in July 2019 with a remarkable score of 8½/10 points. Later that same year, he triumphed in the World Youth Championships in the Under-18 section, achieving a score of 9/11. By December 2019, he had earned a rating of 2600, making him the second-youngest person to reach this milestone.

In 2023, Praggnanandhaa etched his name in history by becoming the youngest player to ever reach the Chess World Cup final. The final match against the world's number one player, Magnus Carlsen, resulted in a draw, leading to a tie-break. Praggnanandhaa's resilient defense held strong, denying Carlsen a clear victory.

Praggnanandhaa's journey from a young chess enthusiast to the youngest-ever Chess World Cup finalist is a testament to his exceptional talent, unwavering dedication, and relentless hard work. His achievements have not only made him a role model for aspiring chess players but have also instilled immense pride in his country. As Praggnanandhaa continues to excel in the world of chess, he remains an unparalleled source of inspiration for many.

Write down the words as per KWL method

K = KNOW	W = Want to KNOW	L = LEARNT
What we already know before reading.	What we Want to know from reading the text.	What we learnt from reading the text.
Eg. Chess	Eg. Unparalleled	Eg. Tie-break

12 Predictions for the Future of Technology: Insights from Vinod Khosla

By Julio Pessan

In his TED Talk, renowned venture capitalist and technology entrepreneur Vinod Khosla shared his visionary predictions for the future of technology. Khosla's insights are not only a testament to his techno-optimism but also a call to action for entrepreneurs and innovators to embrace the improbable and drive radical progress. Here, we explore Khosla's twelve predictions, each offering a glimpse into a future where technology transforms the way we live, work, and interact.

1. Free Expertise Enabled by AI

Khosla envisions a future where artificial intelligence (AI) makes most expertise free and accessible to everyone. Imagine a world where every individual has 24/7 access to a primary care doctor, a tutor, or a structural engineer at no cost. AI-powered solutions could democratize knowledge, making high-quality expertise available to all, regardless of their location or financial status. This shift could revolutionize healthcare, education, and various professional fields, significantly reducing barriers to entry and leveling the playing field.

2. The Rise of Bipedal Robots

The advent of bipedal robots could redefine the labor market. Khosla predicts a future where a billion robots perform tasks currently done by human labor, freeing people from monotonous and repetitive jobs. This automation could lead to an era of unprecedented productivity and creativity, as humans are liberated to pursue more meaningful and intellectually stimulating work. However, it also underscores the importance of empathy and care in ensuring that displaced workers are supported and retrained for new opportunities.

3. Computing as a Utility

Just as electricity is an invisible yet essential part of our daily lives, Khosla foresees computers becoming a ubiquitous utility. We will no longer need to learn how to use computers; instead, they will adapt to us. Voice-activated devices and intuitive interfaces will make technology seamlessly integrate into our environments, enhancing productivity and convenience without demanding our constant attention.

4. AI in Creative Arts

Khosla is particularly excited about the impact of AI on creativity and entertainment. He believes that AI, alone or in collaboration with humans, will elevate the level of creativity and diversity in these fields. AI's ability to generate music, art, and design will open new frontiers in cultural expression, offering unprecedented opportunities for artists and creators to explore and innovate.

5. Agent-Based Internet Access

In the future, internet access will be largely managed by intelligent agents. These autonomous digital assistants will perform tasks, gather information, and provide personalized services, making our interactions with technology more efficient and tailored to our needs. This evolution could transform how we navigate the digital world, making it more intuitive and user-friendly.

6. Preventative Health Care

Khosla predicts a paradigm shift in medicine from reactive “sick care” to proactive health care. Advances in medical technology will enable early detection and prevention of diseases, significantly improving health outcomes. For instance, individuals will be able to identify and manage cardiac conditions long before they lead to heart attacks, thereby extending lifespans and enhancing quality of life.

7. Sustainable Food Production

The future of food will be characterized by new types of proteins and environmentally friendly fertilizers. Khosla highlights the potential of proteins like RuBisCO, which are more sustainable than traditional plant and animal proteins. These innovations could lead to greener agriculture practices and more nutritious food options, addressing both environmental and health concerns.

8. Revolutionary Public Transit

Khosla envisions a transformation in urban mobility with transit systems faster and cheaper than current public transportation and personal vehicles. These systems will be available on-demand, reducing congestion and improving the efficiency of urban transport. The development of such advanced transit solutions, like the one being built in San Jose, promises to make commuting more convenient and sustainable.

9. High-Speed Travel

Imagine flying from New York to London for lunch. Khosla predicts the advent of ultra-high-speed travel, with vehicles capable of reaching speeds up to 4,000 mph. This innovation will shrink the world, making distant locations more accessible and fostering global connectivity. The implications for business, tourism, and cultural exchange are profound, as travel times are drastically reduced.

10. Fusion Power

Fusion power, a long-sought-after energy source, is expected to replace most coal and natural gas power plants. Khosla believes that by retrofitting existing plants with fusion or advanced geothermal technology, we can achieve a significant reduction in carbon emissions while meeting the world’s growing energy demands. This transition to clean, abundant energy is crucial for combating climate change and ensuring sustainable development.

11. Deep Resource Exploration

The future will also see advancements in resource exploration technologies, enabling us to discover and utilize resources from a kilometer below the Earth’s surface. This capability will address concerns about the scarcity of essential materials like lithium and copper, ensuring a steady supply for technological and industrial needs. By tapping into previously inaccessible reserves, we can support the continued growth of various sectors.

12. Carbon Capture and Utilization

Khosla highlights the potential of carbon capture and utilization (CCU) technologies to address climate change. Entrepreneurs are already developing methods to capture carbon dioxide from industrial processes and repurpose it into useful products. For example, a new cement plant in California captures CO₂ and uses it to produce more cement at a lower cost.

Such innovations demonstrate how technology can turn environmental challenges into economic opportunities.

Vinod Khosla's predictions paint a future where technology, driven by entrepreneurial vision and a commitment to the improbable, transforms society in profound ways. These advancements hold the promise of greater efficiency, sustainability, and accessibility across various domains. However, realizing this future requires a collective effort to support innovation, foster empathy, and ensure that the benefits of technology are equitably distributed. As we stand on the brink of this technological revolution, it is crucial to embrace the spirit of techno-optimism with both enthusiasm and caution, striving to create a better world for all.

Link for Blog:

<https://medium.com/@julio.pessan.pessan/12-predictions-for-the-future-of-technology-insights-from-vinod-khosla-ceaad07335ce>

Questions:

1. Vinod Khosla's primary focus in his TED Talk was:

- A) Critiquing the current state of technology
- B) Predicting future technological advancements
- C) Analyzing the economic impact of technology
- D) Discussing the ethical implications of AI

2. The concept of "computing as a utility" implies that:

- A) Computers will become more expensive
- B) People will need to learn complex coding skills
- C) Technology will seamlessly integrate into our lives
- D) Computers will have limited functionality

3. Khosla's prediction of high-speed travel could potentially lead to:

- A) Increased pollution
- B) Reduced global inequality
- C) Greater cultural exchange
- D) All of the above

4. The development of fusion power is crucial for:

- A) Reducing reliance on fossil fuels
- B) Increasing energy costs
- C) Worsening climate change
- D) Creating new weapons

Speaking

Objective:

To enable students, speak in different situations and exhibit their command of the oral form of language. To explain and train the students for the Speaking Section of the IELTS Exam.

Explanation:

Everyday communication plays a dominant and decisive role in the life of a professional. A professional has to communicate with different people in diversified situations. This may be in the form of interpersonal talks, telephonic conversations, discussions at a meeting, presentations, public speaking and so on. In this Tutorial, the students shall develop and exhibit their command on oral language by expressing their ideas / by responding to various questions arising out of everyday communications / by elaborations on the topics listed on cue cards.

IELTS Speaking Test.

- The Speaking test is the last part of IELTS. It is made up of 3 parts and takes between 11 and 15 minutes. During this time, the examiner asks the candidate about 25 questions.
- In Part 1, the examiner will ask you about yourself and general questions from common topics like work, family, studies, interests and hobbies. It deals with personal questions - where you live, what you do - plus two short familiar topics.
- In part 2 of the Academic Speaking test, you will be given a card with a topic and asked to talk about it for 2 minutes. You will have one minute to prepare for your topic and a pencil and paper to draft your response. In Part 2, the candidate speaks on one topic that the examiner chooses for two minutes. That's around 350 words.
- Part 3 is a two-way conversation, and the examiner will ask questions related to the topic discussed in Part 2.

Part-I: Introduction and Interview

1. Give your self-Introduction.

Good Morning Sir/ Madam.

I am _____ from Ahmedabad. I have completed HSC
from _____ school, _____.

Talking about my family, there are _____ members in my family including me. My father
works in a/an _____ and my mother is a

_____. I have _____ siblings.

My strengths are that I am a _____ and

_____.

I like to make friends and visit new places.

That's all about me.

2. Where do you live?

I live in (...say your area name...) in (...say your town/village/city name...). I have been living there as long as I can remember as it is our permanent residence.

3. Do you have any hobbies or interests? What are they?

I have a number of hobbies such as watching movies, gardening and reading story books. While I enjoy having all of those hobbies, depending on my location, mood and weather condition, the most special one to me is “reading storybooks”.

4. Do you think most programmes on television are good? Why/Why not?

Well, it depends on what kinds of programmes I am watching. However, having said that, I would say that many programs on television are not good because they offer a few educational perspectives. Even the news shows these days are not “objective” enough to offer the values of “news” and therefore, are not trustworthy.

Part-II: Individual Long Turn (Cue Cards)

Note: Prepare brief responses to the following Cue Card topics. The content should cover the question as well as the sub-questions and should be convincing.

1. Describe how you would like to spend a holiday

- Where would you spend a day?
- What would you do during the day?
- Who you might like to spend the day with?

2. Describe the job you would most like to have.

- What would this job be?
- What would you do in this job?
- Explain why you would like to have this job the most.

3. Describe the film you found interesting.

- When did you see this film?
- What was the theme of the film? What happened in the film?
- Explain why you found this film interesting.

4. Describe the party you went to which you enjoyed.

- Where was the party?
- Why did the party happen?
- Explain why you enjoyed the party.

5. Describe a conversation you had with someone which was very important to you.

- When did the conversation take place?
- With whom did the conversation happen?
- What was the conversation about?
- Explain why the conversation was very important to you.
