

KWL Method for Reading.

KWL Means K=Know – What we already know before reading.

W= Want to know – what we Want to know from reading the book.

L = Learnt – What we learned from reading the book.

The K-W-L strategy serves several purposes

- Elicits students' prior knowledge of the topic of the text.
- Sets a purpose for reading.
- Helps students to monitor their comprehension.

To learn the text in a better way it is important to read in the KWL method.

- The KWL method is one of the most useful methods to read and comprehend in a better way.
- The KWL method consists of three different stages.
- The first stage is to take a book and write down the points that you know about the book. For e.g. The title of the book, the name of the author, any history related to the book, anything related to the topic of the book, etc.
- Then we should put down the points that we want to learn after the reading of the book. We should write down these points so that we are clear about the purpose of reading the book.

- Then as we read the book, we should also note down the points that are related to the topic that we wanted to learn, and in the end, we must analyze what did we learned out of the reading of the book.
