

UNIT-2

W

Concept of Word Processing

O1

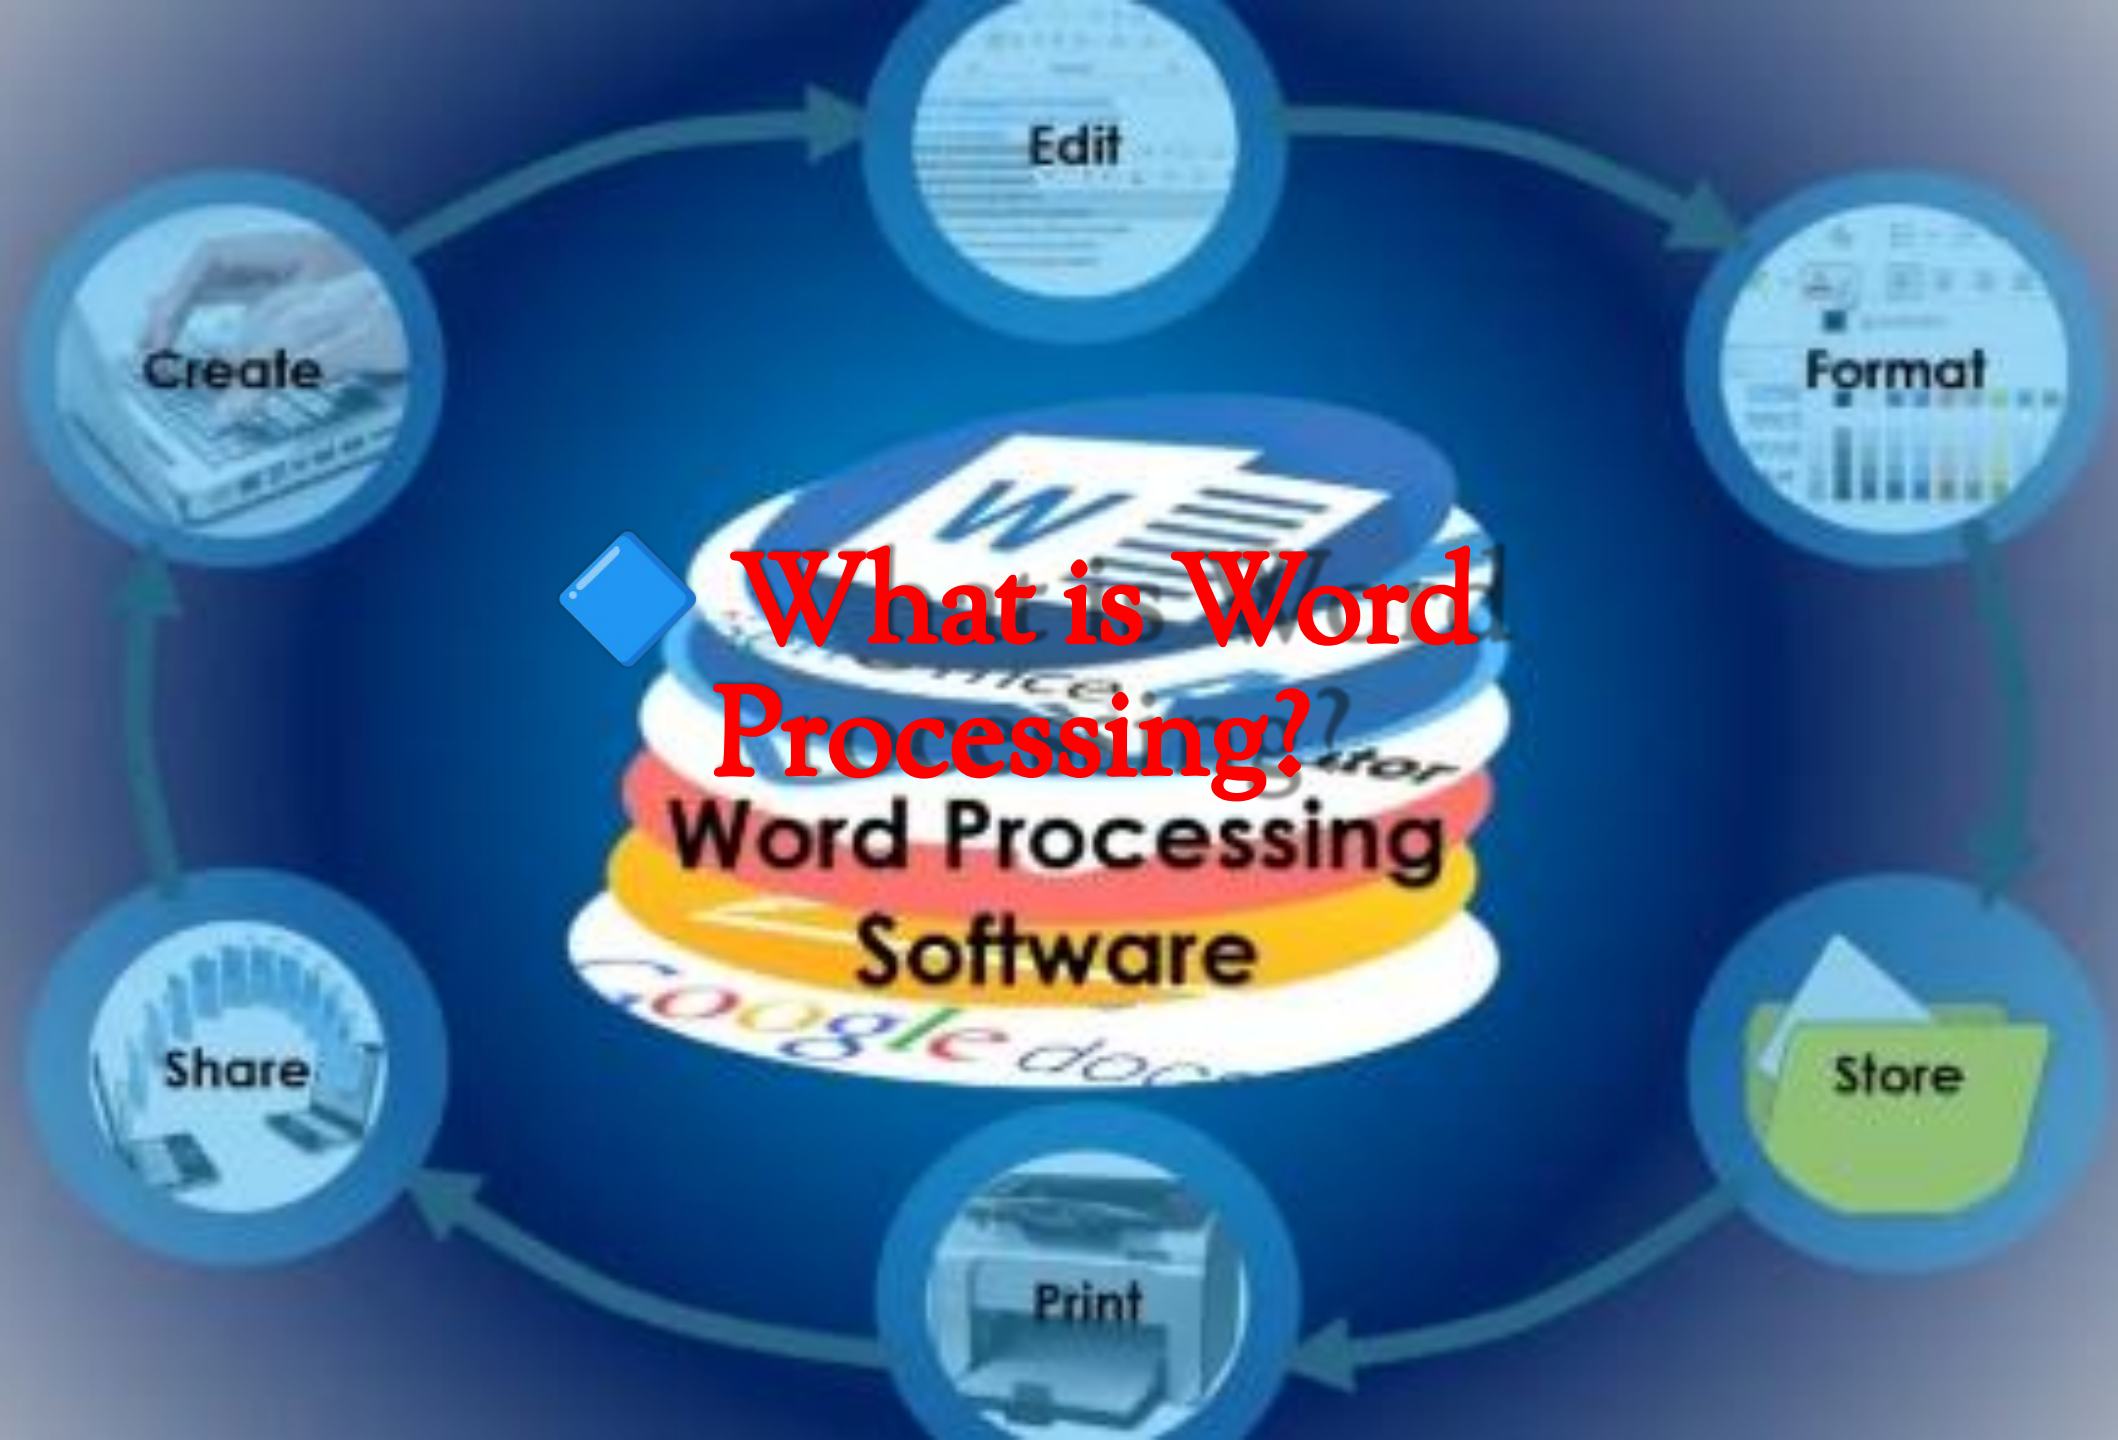

WHAT IS
WORD
PROCESSING?

O2

WHY WORD
PROCESSING
USE?

O3

COMMAN USE
AND KEY
FEATURES?

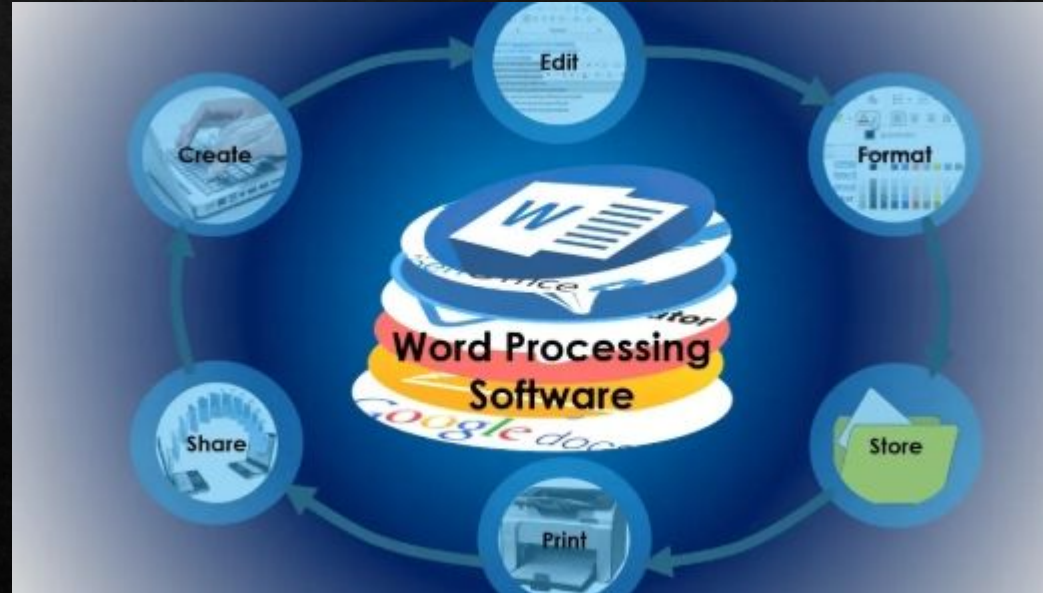

◆ What is Word Processing?

Word Processing Software

◆ WHAT IS WORD PROCESSING?

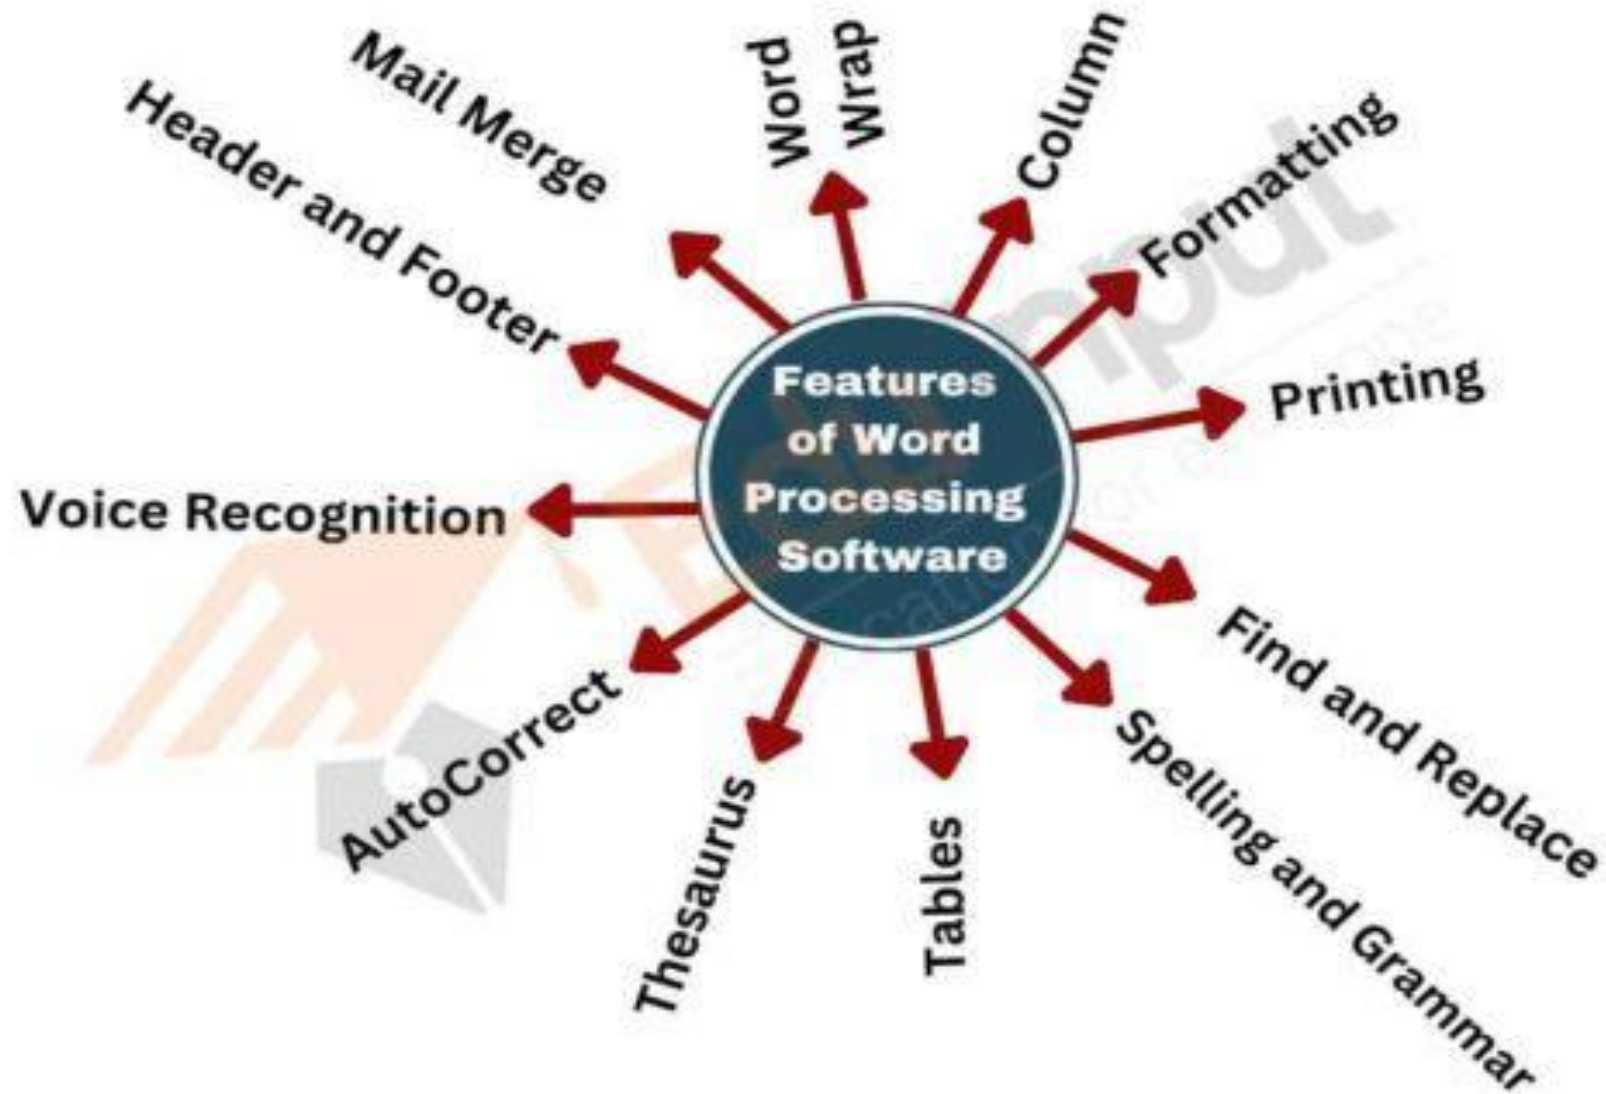

- ◆ **Word Processing** means using a computer program to **create, edit, format, and print** text-based documents. This program is called a **word processor**.
- ◆ 👉 The most popular word processor is **Microsoft Word**. Other examples include **Google Docs**, **WPS Office**, **LibreOffice Writer**, etc.

Why Use Word Processing?

- ◆ Before computers, people used **typewriters** to write documents. Any mistake had to be retyped. With **word processors** , you can:
- ◆  Easily correct mistakes
- ◆  Format text (make it bold, change color)
- ◆  Save, print, and edit the file anytime
- ◆  Add pictures, tables, and charts
- ◆  Share documents quickly

◆ Common Uses And Features of Word Processing:

Common Uses of Word Processing:

Use Case	Example
Letters	Writing official or personal letters
Reports	School or office reports
Resumes	Creating professional resumes
Question Papers	Teachers preparing exams
Applications/Forms	Making printable forms
Certificates	Designing certificates with student names

Key Features of a Word Processor (like MS Word):

- Text Formatting:**

Change font size, style, color, and alignment (left, center, right)

- Editing Tools:**

Cut, copy, paste, undo, redo

- Spell & Grammar Check:**

Underline mistakes in red or blue and suggest corrections

- Insert Tools:**

Add images, tables, charts, shapes, page numbers, etc.

- Page Layout:**

Set margins, orientation (portrait or landscape), paper size

- Saving and Printing:**

Save files as .docx, .pdf or print directly

- Document Views:**

Read Mode, Print Layout, Web Layout

- Mail Merge:**

Send personalized letters or emails to many people

Applications of Word Processing

◆ What Does "Applications of Word Processing" Mean?

- ◆ The **applications** of word processing refer to the **various ways we use word processing software** (like MS Word) in real life—for education, business, personal tasks, and more.

Where Do We Use Word Processing?

Below are the **main areas** where word processors are widely used:

Application Area	Example Work
Education	Notes, certificates, reports
Office	Letters, reports, invoices
Personal	Resumes, invitations, journals
Publishing	Books, newsletters, eBooks
Government	Circulars, notices, official letters
Marketing	Mass emails using mail merge

What is Paragraph Formatting?

- ❖ **Paragraph formatting** means **changing the appearance and layout of entire paragraphs** , such as alignment, spacing, indentation, etc.
- ❖  **Common Paragraph Formatting Options:**

Option	Description	Example
Alignment	Position text in page: Left, Center, Right, Justify	Centered title
Line Spacing	Space between lines in a paragraph	1.0, 1.5, 2.0
Paragraph Spacing	Space before or after a paragraph	Space between two paragraphs
Indentation	Move text in from the margin	Used in essays, letters
Bullets & Numbering	Make lists	 List of items

Text Alignment Options

Type	Description
Left	Aligns text to left side (Default)
Center	Text is centered in page
Right	Aligns text to right side
Justify	Spreads text evenly left to right

Find and Replace Text in MS Word

◆ What is "Find and Replace"?

- ◆ Find and Replace is a feature in MS Word that allows you to:
- ◆ Quickly search for a word or phrase (Find)
- ◆ Automatically change it to something else (Replace)

✓ Why Use It?

- ◆ To correct spelling mistakes in large documents
- ◆ To change a name, date, or term throughout the document
- ◆ To update old information in a new version of a document

Steps to Use Find and Replace:

📌 **Method 1:** Using the Menu

1. Open your MS Word document
2. Click on the **Home** tab
3. Click **Replace** (on the right side)
4. A box will appear

- In **Find what**, type: Ganpat
- In **Replace with**, type: GUNI
- 5. Click **Replace All** to change all occurrences

📌 **Method 2:** Using shortKey

1. Press ctrl+H
2. Follow the same steps in the pop-up box

Spell & Grammar Check

- ◆ **What it does:** Checks your document for spelling and grammar mistakes.
- ◆ **How to use:**
Go to **Review** tab → Click **Spelling & Grammar** .
- ◆ **Example:**
If you type "Ths is gud", Word suggests: "This is good".
- ◆  *Real-life use:* Writing a resume or assignment error-free.

✓ Tabs and Indentation

- ◆ **Tabs:** Used to align text neatly.
Indentation: Adds space before the start of a paragraph.
- ◆ **How to use:**
Use **Tab** key or go to **Layout** → **Indent Left/Right** .
- ◆ **Example:** Paragraphs in formal letters are indented.
- ◆ 📌 *Real-life use:* Creating neat official letters or notices.

Enhancing a Document

- ◆ Improves appearance using font styles, sizes, colors, highlights, and borders.
- ◆ Adds visual emphasis to key content.
- ◆ Enhances engagement and clarity.
- ◆ Used in projects, resumes, and announcements.
- ◆ **Example:** Important dates highlighted in red and bolded.
- ◆ **Improvement Steps:**
 - Highlight text.
 - Use the “Font” and “Paragraph” toolbars.
 - Apply font styles, background colors, and shading.

Different Views of Document and Its Use

- ◆ Includes Print Layout, Web Layout, Read Mode, and Outline View.
- ◆ Allows switching between editing and reading formats.
- ◆ Helps manage large or printed documents efficiently.

•Improvement Steps:

- 1.Go to “View” tab.
- 2.Choose appropriate mode (e.g., Print Layout).
- 3.Use Zoom and Navigation Pane for better control.

Types of views:

View Type	Description	Use Case
Print Layout	Shows how the document will print	Most commonly used view
Read Mode	Full-screen reading without editing options	For reading assignments
Web Layout	Shows how the page would look online	Designing web pages
Outline	Displays only headings	For planning structure of long docs
Draft	Simple view without page formatting	Fast editing of plain text

Bullets and Numbering

Purpose:

- ◆ Create organized lists using symbols (●) or numbers (1., 2., 3.)
- ◆ Bullets: unordered items; Numbering: ordered steps.
- ◆ Enhances document clarity and structure.
- ◆ Used in instructions, checklists, and outlines.
- ◆ **Example:** Steps to complete a project listed numerically.

Bullets and Numbering

◆ Use:

- Go to **Home** → **Bullets/Numbering**
- You can customize styles too.

◆ Real-Life Example:

- A shopping list:
 - Milk
 - Bread
 - Eggs

◆ A step-by-step instruction:

1. Open Word
2. Click File
3. Choose Print

Page Setup

- ◆ The **Page Setup** feature in Microsoft Word lets you control the layout and formatting of your document pages. It determines how your text, images, and other content will appear on paper or on screen. Setting up your page correctly is essential for professional-looking documents, proper printing, and readability.
- ◆ **How to Access Page Setup:**
 - ▢ Go to the **Layout** or **Page Layout** tab on the ribbon.
 - ▢ Click on the small launcher arrow in the **Page Setup** group (bottom-right corner).
 - ▢ Alternatively, you can go to **File > Print > Page Setup** .

What You Can Change in Page Setup:

1. Margins

Margins are the empty spaces around the edges of your page.

1. You can make these spaces bigger or smaller.
2. Bigger margins mean less space for writing, smaller margins give you more room.

2. Orientation

This decides if your page is:

1. **Portrait** (tall and narrow, like a normal book page)
2. **Landscape** (wide and short, like a calendar)

3. Paper Size

This sets the size of the paper you want to use, like:

1. Letter size (common in the US)
2. A4 size (used in many other countries)

4. Gutter

If you are going to bind your paper like a book, gutter adds extra space on the side so the text doesn't get cut off.

5. Headers and Footers

You can set how much space you want at the top (header) and bottom (footer) of the page for things like page numbers or titles.

Why is Page Setup Important?

- ◊ It helps your document look neat and clean.
- ◊ It makes sure your text.
- ◊ It helps your document print correctly. doesn't get too close to the edges
- ◊ It can make your document easier to read.

video:-<https://youtu.be/CCeRlrWOPUU?si=DTuHR5aeeR4tHHqL>

Columns

Columns split your text into vertical sections, like in newspapers or magazines. Instead of one big block of text going all the way across the page, your text flows down one column and then continues at the top of the next column.

Why Use Columns?

- ◆ Makes your text easier to read, especially for newsletters or brochures.
- ◆ Helps organize information neatly.
- ◆ Gives your document a professional look.

How to Add Columns:

- ◆ Go to the **Layout** tab at the top of Word.
- ◆ Click on **Columns** .
- ◆ Choose how many columns you want (1, 2, 3, or more).
- ◆ Your text will automatically be arranged in those columns.

Insert Table, Chart, Shapes

Tables help you arrange data in a **grid format** (rows and columns), making it easier to read and compare information.

✓ Steps to Insert a Table:

1. Open Microsoft Word.
2. Click on the **Insert** tab in the ribbon.
3. Click on **Table**.
4. A grid will appear – drag your mouse over the grid to select the number of rows and columns you need.
5. Click, and the table will be added to your page.

🎯 Use of Tables:

- Helps in organizing data like names, marks, dates, prices, etc.
- Makes complex data easier to read and understand.

TABLE

- ◆  Real-Life Example:
- ◆ Imagine you are a teacher preparing a mark sheet for students:

Student Name	Subject	Marks
Raj	Maths	85
Simran	Science	90

2. Inserting Charts

2. Inserting Charts

- ♦ Charts are **visual representations of data** . They make data easier to understand at a glance, especially when comparing values or showing changes over time.

Steps to Insert a Chart:

- ♦ Click the **Insert** tab.
- ♦ Choose **Chart** .
- ♦ Select the type of chart you want (bar, line, pie, etc.).
- ♦ An Excel sheet will open – enter your data there.
- ♦ Close the sheet, and the chart will appear in your Word document.

Use of Charts:

- ♦ Best for showing trends, patterns, or comparisons.
- ♦ Helps in analyzing data quickly.

Real-Life Example:

- ◆ Suppose you want to show the **monthly sales** of a shop:
- ◆ January: ₹5,000
- ◆ February: ₹8,000
- ◆ March: ₹6,500
- ◆ Using a **bar chart** makes it easy to compare which month had the highest or lowest sales.

3.Shapes

- ◊ Shapes like arrows, circles, boxes, and callouts are used for **drawing attention** , creating diagrams, or making your document more attractive.

Steps to Insert a Shape:

- ◊ Go to the **Insert** tab.
- ◊ Click **Shapes** .
- ◊ A dropdown will appear – choose a shape (e.g., arrow, rectangle, star).
- ◊ Click and drag on the document to draw the shape.

Use of Shapes:

- ◊ Used to highlight important points.
- ◊ Help in creating flowcharts, diagrams, or illustrations.

Table Operations

- ◆ Tables help us organize information in rows and columns. After inserting a table in Word, we can **perform many operations** to change its design, size, layout, or data.

1. Insert a Table

- ◆ This is the first step. You can insert a table by:
- ◆ Going to the **Insert tab** .
- ◆ Clicking on **Table** .
- ◆ Choosing the number of rows and columns.
- ◆  *Example:* To create a timetable, insert a table with 6 rows and 5 columns.

◆ 2. Add or Delete Rows/Columns

- ◆ You can add or remove rows and columns easily.

+ To Add:

- ◆ Right-click on a table cell.
- ◆ Choose **Insert** → then select:
 - Insert **Row Above** / **Below**
 - Insert **Column to the Left** / **Right**

— To Delete:

- ◆ Select the row or column.
- ◆ Right-click → Click **Delete Cells** → choose **Delete row/column** .
- ◆ 📌 *Example:* If you forgot to add a subject in your timetable, you can add a new column.

◆ 3. Merge Cells

- ◆ **Merging** means joining two or more cells into one.

👉 Steps:

- ◆ Select the cells you want to merge.
- ◆ Right-click → Click **Merge Cells** .
- ◆ 📌 *Example:* You can merge the top row to make one big heading for the entire table like “Class Time Table”.

4. Split Cells

- ◆ **Splitting** means dividing one cell into multiple rows or columns.

👉 Steps:

- ◆ Click on the cell.
- ◆ Right-click → Choose **Split Cells** .
- ◆ Choose how many rows and columns you want.
- ◆ 📌 *Example:* You can split a cell into two if two teachers share a period.

◆ 5. Change Table Style

You can make your table look colorful and professional.

👉 Steps:

- ◆ Click on the table.
- ◆ Go to the **Table Design** tab.
- ◆ Choose from different **Table Styles** , colors, borders, and shading.
- ◆ 📌 *Example:* Use different colors for headings and data rows to make it look neat.

◆ 6. Adjust Row Height and Column Width

You can make rows or columns bigger or smaller.

👉 Steps:

- ◆ Click and drag the **row or column border** .
- ◆ Or, go to **Layout tab** → enter specific size values.
- ◆ 📌 *Example:* Make the column wider to fit long names properly.

◆ 7. Align Text in Table Cells

◆ 7. Align Text in Table Cells

- ◆ You can align text to the top, center, bottom, left, or right inside a cell.
- ◆ 👉 **Steps:**
- ◆ Select the cell.
- ◆ Go to the **Layout tab** → Use **Alignment** options.
- ◆ 📌 *Example:* Center-align all headings for a clean look.

◆ 8. Sort Data in Table

You can sort table data alphabetically or numerically.

- ◆  **Steps:**
- ◆ Click inside the table.
- ◆ Go to **Layout tab** → Click **Sort**.
- ◆ Choose to sort by column, A-Z or Z-A.
- ◆  *Example:* Sort a student list by their names or marks.

9. Convert Table to Text and Vice Versa

- ◆ You can change a table into plain text or change text into a table.

👉 To Convert to Text:

- ◆ Select the table → Go to **Layout tab** → Click **Convert to Text** .

👉 To Convert Text to Table:

- ◆ Select the text → Go to **Insert tab** → Click **Table** → **Convert Text to Table** .
- ◆ 📌 *Example:* If you have names separated by commas, you can turn them into a table.

Header and Footer

What is it?

- ◆ A **Header** appears at the **top** of every page in your document.
- ◆ A **Footer** appears at the **bottom** of every page.

Why use it?

- ◆ To add consistent information like **title** , **author name** , **date** , or **institution name** .
- ◆ Makes your document look more professional.

How to insert:

- ◆ Go to the **Insert** tab.
- ◆ Click **Header** or **Footer** .
- ◆ Choose a design and type your content.
- ◆ It appears on all pages unless specified otherwise.

Page Number

- ◆ **What is it?**
 - ◇ Page numbers help keep your pages in order, especially in multi-page documents.
- ◆ **How to insert:**
 - ◇ Click **Insert > Page Number** .
 - ◇ Choose **Top of Page** , **Bottom of Page** , or **Page Margins** .
 - ◇ It automatically numbers your pages in order.

Footnote and Endnote

What are they?

- ◆ A **Footnote** gives extra information at the **bottom of the page** .
- ◆ An **Endnote** appears at the **end of the document or section** .

Use:

- ◆ To explain difficult words, give source references, or add comments without disturbing the main text.

How to add:

- ◆ Go to **References > Insert Footnote / Insert Endnote** .
- ◆ Type your note. Word adds the number automatically.

Mail Merge

What is it?

- ♦ Mail Merge is used to **send the same document to many people** , but with personalized details (like names, addresses).

Where used?

- ♦ Sending letters, emails, invitations, certificates to multiple people.

Steps:

- ♦ Go to **Mailings > Start Mail Merge** .
- ♦ Select your type (letter, email, etc.).
- ♦ Use a list (like Excel) for names.
- ♦ Insert fields like **<<First Name>>** .
- ♦ Click **Finish & Merge** to generate personalized documents.

Mail Merge

Date. 03-03-2025

Respected Guardian,

I hereby inform to you that your son/daughter <<STUDENTNAME>>is studying in our college in <<COURSE>>Sem-II Div-A, Department Of Computer Science. He /She is irregular in college. You are informed to meet Class Teacher's at college during college hours (11:40 a.m. to 5:20 p.m.). At the end of the term if his/her total attendance is not as per the norms (minimum 70%) then his/her term will not be granted.

Thanking You.

Enrollment No: <<ENO>>

Attendance:<<PER>>%

Class Teacher

Sahil P. Chaudhary

Hyperlink

- ◆ A **Hyperlink** is a clickable link that takes you to:
- ◆ A website
- ◆ An email
- ◆ Another part of the document

How to insert:

- ◆ Select the text or image.
- ◆ Press **Ctrl + K** or go to **Insert > Link** .
- ◆ Enter the web address or document location.

References

What is it?

- ◆ Helps you add **citations and bibliography** to show where your information came from.

Where used?

- ◆ In reports, academic writing, or research work.

Steps:

- ◆ Go to **References > Insert Citation** .
- ◆ Add your source (book, website, journal).
- ◆ To generate a list, click **Bibliography** .
- ◆ You can choose different styles like APA, MLA, or Chicago.

Page Layout

What is it?

- ◇ Controls how your page looks – margins, orientation, size, etc.

Main features:

1. **Margins** : Space around your text
 2. **Orientation** : Portrait (vertical) or Landscape (horizontal)
 3. **Size** : A₄, Letter, etc.
 4. **Columns** : Split text into multiple columns (like in newspapers)
- ◇ ♦ **How to use:**
 - ◇ Click the **Layout** tab (or Page Layout in older versions).

Document Protection

What is it?

- ◆ Allows you to **control who can edit, view, or change your document**.

Types:

- ◆ **Read-Only** : Others can see but not edit.
- ◆ **Password Protected** : Only people with the password can open or edit.
- ◆ **Restrict Editing** : Only specific parts can be edited.

How to apply:

- ◆ Go to **File > Info > Protect Document** .
- ◆ Choose your protection method.
